NCBA RWANDA

ANNUAL REPORT 2022

NCBA Bank Rwanda ("NCBA" or "the Bank") has adopted the International Integrated Reporting Council's (IIRC) - Integrated Reporting Framework as the basis of our reporting structure. NCBA firmly believes that integrated reporting provides a platform that enables our stakeholders to better appreciate the interplay and interaction of various factors, both financial and non-financial, which ultimately affect our performance in our pursuit of creating long-term sustainable value.

This report considers key factors that principally revolve around the capitals that the Bank and NCBA Group rely upon and their contribution to its success, capacity to respond to stakeholders' legitimate needs and interests, and ability to adapt our business model and strategy to exploit the risks and opportunities presented by our external environment. Further, this report aims to make corporate reporting more transparent and meaningful for our stakeholders and also highlights details of our strategies, opportunities, and challenges in realizing sustainable value for the future. It contains a summary of our strategies, businesses, products, services, and value-creation efforts toward ensuring our business's continued and sustainable success.

ABOUT THIS REPORT

OUR REPORT PRESENTS THE FOLLOWING KEY AREAS

Area	Content
NCBA and its External Environment	Overview of the Bank's structure, its history, and relationships with our stakeholders.
Governance	Leadership and operational oversight structure in harnessing strengths and mitigating risks towards value creation.
Our business	Describes the Bank's operating model, delivery mechanism, and its contribution to the protection of sustainable value.
Risks and Opportunities	Describes the challenges faced in, and opportunities available for the achievement of value creation.
Strategy and Resourcing allocation	Highlights the strategic objectives upon which we measure the success of our promise of collaborating to inspire growth.
Performance	Details how the Bank's different business lines performed.
Outlook	Details factors that could affect the Bank's sustainability, whether positively or not, and the projected future performance and sustainability of the Bank.
Basis of preparation and presentation	General reporting guidance as adopted for the presentation of the Bank's financial and non-financial performance

All the financial information contained in this report has been presented in accordance with the International Financial Reporting Standards (IFRS) applicable to our operations and businesses.

The **Financial Statements** contain comprehensive information on the business carried out during the period of **January 1 to December 31, 2022**.

OUR CORPORATE PROFILE

WHO WE ARE

NCBA entered the Rwanda market in 2016 as CBA Holdings Limited, a Microfinance providing mobile savings and loans (MSL) business/products. In 2017, CBA Group in Kenya acquired Crane bank and merged its operations with CBA Holdings. In 2018, Commercial Bank of Africa was awarded a banking license by the National bank of Rwanda.

The Bank officially re-branded to "NCBA Bank Rwanda", following the merger of NIC Bank and CBA Bank in October 2019.

With the rebrand, we harness the strengths of NCBA Group Plc to create a Bank that brings together the best of both worlds – from cutting-edge mobile banking to good old-fashioned relationship management; from scalable business banking to financial services that grow as your business does; from the best-in-class choice of products to investment solutions tailored to your specific needs.

NCBA Bank Rwanda is a commercial bank that offers a range of financial products and services to individuals and businesses in Rwanda. The bank is a subsidiary of NCBA Group Plc – a regional financial services group with headquarters in Kenya and operations in five African countries (Uganda, Tanzania, Rwanda, Ivory Coast, and Kenya).

NCBA Rwanda operates under a universal banking model, which involves providing core banking products and services to both retail and corporate customers, as well as digital banking services and digital payments solutions. The Bank operates through a network of branches and digital channels, with the core activities being lending, deposit-taking, payment processing, foreign exchange trading, treasury management, risk management, and customer service.

OUR MISSION, OUR VISION AND OUR VALUES

OUR PURPOSE

To be the Financial Services Partner that
Inspires Your Growth

BUSINESS SEGMENT ANALYSIS

Business Segmentation

In a bid to create long-term value and provide personalized services, the Bank segments its customers broadly in four main clusters:

Retail/Consumer Banking

Delivering the highest level of personalized financial services

Corporate Banking

Providing an array of solutions to large corporates, and institutions (such as multinationals, NGOs, government institutions, ministries, insurance companies, and other financial institutions)

Business Banking

Providing financial solutions to micro enterprises, small enterprises, and medium enterprises (like traders, retailers, and manufacturers).

Mobile Savings and Loans (MSL)

Providing digital financial solutions (savings and loan facilities) to banked and unbanked retail clients.

OUR PRODUCTS

NCBA Rwanda's customer proposition is geared towards ensuring convenience to the customer, offering customized business solutions, and establishing great partnerships that deliver innovation, long-term value, and growth.

In addition to conventional banking services, NCBA offers Mobile Savings and Loans (MSL) products targeting especially the unbanked population segment in order to improve financial inclusion in the country.

(i) Retail Banking Customer Products

The Bank offers the following products to the segments listed above:

▶ Current Accounts, Fixed Deposit Accounts, and Saving Accounts.

▶ Secured personal loans

▶ Car loans

▶ Mortgage facilities

▶ Card services: VISA debit and credit cards.

(ii) Business and Corporate Banking Segments

Business and Corporate Banking category includes Small and Medium Enterprises (SMEs) which are further segmented into 3 tiers and Corporate customers.

The key products offered to the above customer base include the following:

- Current Accounts, Fixed Deposit Accounts, and Saving Accounts.
- Business loans that include working capital financing in form of overdraft facilities, contract financing, and Invoice discounting.
- They also benefit from Investment loans and Asset Finance Loans.
- Off-balance sheet items that include Bid Securities, Performance guarantees, Advance payment guarantees, etc.

The Bank also offers Trade finance solutions in the form of Bills for Collection, Letters of Credit among others.

OUR STRATEGY & VALUE CREATION MODEL

OUR STRATEGY

The current strategy cycle (2020-2024) continuously focuses and prioritizes 5 key pillars to position and drive the growth of NCBA Rwanda, and ultimately NCBA Group as a major financial player in Africa.

The strategic priorities are:

1. To become a distinguished brand known for customer experience.

The Bank takes customer experience as a top priority theme, ensuring that our customers receive quality service across all our touch points. Specific Customer experience metrics have been put in place and are tracked as part of employee performance. We value customer feedback which is incorporated in our employee training programs.

2. Scaling up retail banking.

One of the NCBA's strengths is its distribution channels especially the digital platforms which are aimed at offering exceptional customer experience, driving financial inclusion and using innovative techniques to reach our customers. We are focused on having at least one branch in all the provinces by 2024 to expand our countrywide outreach.

The Bank offers tailored products and services for the retail customers with attractive lending and deposit propositions. These include mortgages where customers can apply for the entire loan without the need for own contribution (**Mortgage 105%**), asset finance and personal loans among other loan types. Customers can also benefit from attractive savings accounts, current accounts and fixed term deposits.

3. Deepening NCBA leadership in corporate banking & asset finance:

NCBA's Asset Finance offering is one of the leading in the region, with a focus on customer experience,

asset package, and turnaround time. The Bank plans to maintain the top spot by continuous improvement on our products and relationships with all stakeholders. We offer to finance for a broad category of assets which include motor vehicles, machinery, and equipment.

4. Enabling digital transformation.

The main focus of the Bank is to provide customers with convenient channels that facilitate secure and seamless banking services towards this end, we offer internet and mobile banking services to our customers. Through our strategic partnership with MTN Rwanda, MoKash has over 3 million customers making NCBA the largest bank in Rwanda by customer base.

5. Developing a high-performance employee culture.

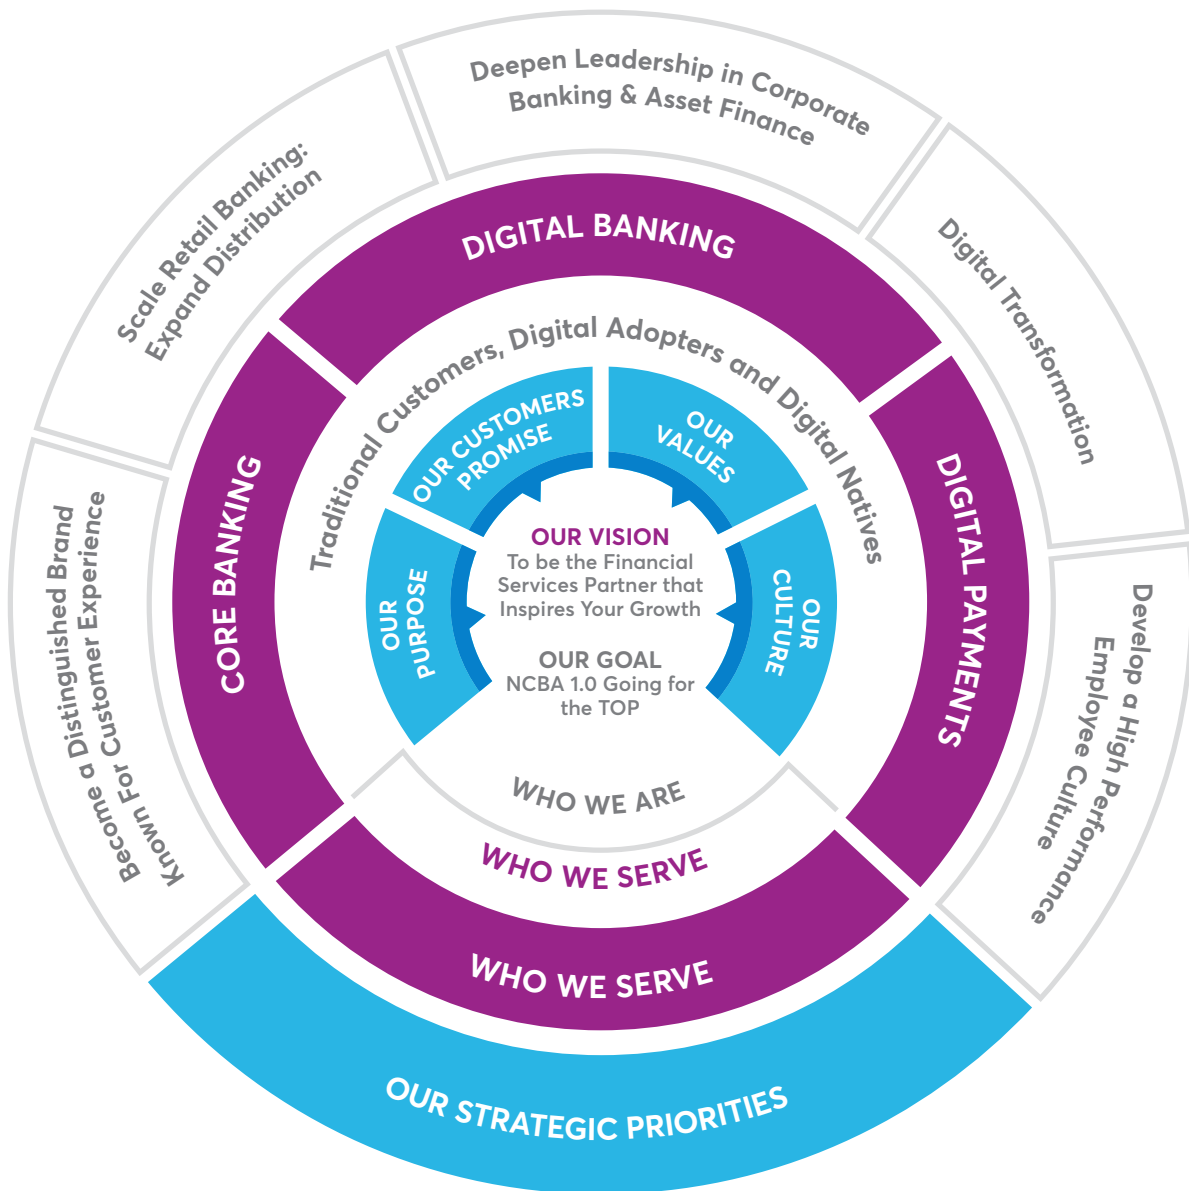

NCBA provides an enabling environment to all its employees, giving clear career development, training, and team building opportunities. The work environment is tailored to improve performance and efficiency while taking care of the human capital. Employee welfare is at the forefront of the Human Resources management plan.

The Bank offers its employees fully paid medical cover, life insurance, regular health checks, enrollment to sports and fitness centers and several other welfare benefits.

OUR VALUE-CREATION MODEL

How We Create Value

Our purpose is to create value for all stakeholders by leveraging our resources, maintaining our relationships, and optimizing financial performance. Our value creation process is integrated into our business model and decision-making process.

Our Capitals

The Integrated Reporting Framework allows organizations to tailor their approach to fit their business context by conveying the concept of how value is created for society.

Our report describes our value creation through the lens of our stakeholder relationships by adopting a framework that recognizes that not all capitals are equally relevant or applicable to all organizations.

Capitals	Input	Outcome
 <p>FINANCIAL CAPITAL</p> <p>Our financial capital strength which comes from our strong capital base, as well as diversified sources of deposits and funding from investors and customers are used to support our customers working capital challenges, providing efficient cash management and servicing FX requirements. Our role also commits to finance sustainable businesses through our sustainability agenda and rewarding our shareholders.</p>	<ul style="list-style-type: none"> Share Capital: RWF 24.7Bn. We opened 2 branches in 2022 (Location: Nyabugogo & Kayonza) 	<ul style="list-style-type: none"> Our Loan book grew by 67%. Customer deposits grew by 36%. Our profitability (PBT) grew by +100% to RWF 4.9Bn and ROE enhanced from 2.9% to 14.2%
 <p>HUMAN CAPITAL</p> <p>Our employees, our 'Go Getters', are our greatest assets in achieving our strategy goals and we progressively focus on enriching our people, our culture, our collective knowledge, and our skills and experience to enable development of innovative and competitive solutions for our customers and create value for all stakeholders.</p>	<ul style="list-style-type: none"> Total No. of Staff: 98 Salaries & Benefits of RWF 3Bn 	<ul style="list-style-type: none"> Total No. of Staff: 98 Workforce Gender Ratio (Female - Male): 48%-52% Employee Engagement Score: 82% Productivity highlighted through our staff costs to income ratio improving from 36% to 23%.

Capitals	Input	Outcome
 <p>INTELLECTUAL CAPITAL</p> <p>We have built significant knowledge over time to increase leadership in various business segments.</p> <p>NCBA Rwanda started providing organized mobile money solutions in 2017 through our relationships with Telcos. We are now the leader in mobile money by numbers and customer base regionally. GOVERNANCE

FINANCIAL STATEMENTS NOTES &

HIGHLIGHTS OF NCBA 1.0 STRATEGY EXECUTION

2022 in Review

The Bank's strategy introduced in 2020 is in the third year of its five-year strategic journey (2020 – 2024) of "Building the Bank of the Future". In 2022, the Bank made significant and structural progress to deliver sustainable value creation, and the outcomes of our transformation since 2020 are evidence of the progress we are making towards fulfilling the 2024 ambitions.

As part of our commitment to contribute to the country's economy, the Bank invested more than USD 2 Million in the upgrade of the MOKASH platform in a

bid to improve on our services. Resulting in increase in usage and significant growth of our customer base.

During the year, the Bank conducted an employee engagement assessment contracted to an external party and the result highlighted an index score of 82 – well above the global index of 75. The Bank also sustained a strong Net Promoter Score of 78%, and a customer effort score of 97% – and remains focused on improving this further with several initiatives to boost levels of service.

PEOPLE MANAGEMENT

NCBA Bank Rwanda Plc aims to be a leading Employer of choice in Rwanda and our success depends on having a talented, motivated and committed workforce, having the required abilities, attitude and agility. This is why we continue making significant investments in our people.

We have also designed an Employee Value Proposition that inspires staff towards **"Doing Greatness every day"** in everything.

Strategy Pillar 5: Develop a High-Performance Employee Culture			
Build Capacity	Performance management	Competitive Rewards & recognition	Employee Experience & Wellbeing
 <p>Putting the employee at the center of all we do</p>	 <p>Having a talented, motivated and committed workforce – with the right talent, skills, abilities, attitude and agility.</p>		 <p>Ensuring that we have the best culture, and a great employee experience – delivered through initiatives such as diversity, equity & inclusion, culture, health & wellbeing.</p>

1. Build Capacity

Our HR strategy aims at attracting, developing, motivating and retaining top talent. In 2022, our focus was ensuring that we have robust career planning and progression, rewards & recognition and compensation programs that ensured we remain competitive.

We achieved a talent retention of 88% through various initiatives that included career management programs such as learning & development and succession planning, all aimed at enhancing the skills and technical competencies of employees in line with their various career aspirations.

Staff promoted in 2022	22

3. Employee Experience & Wellbeing

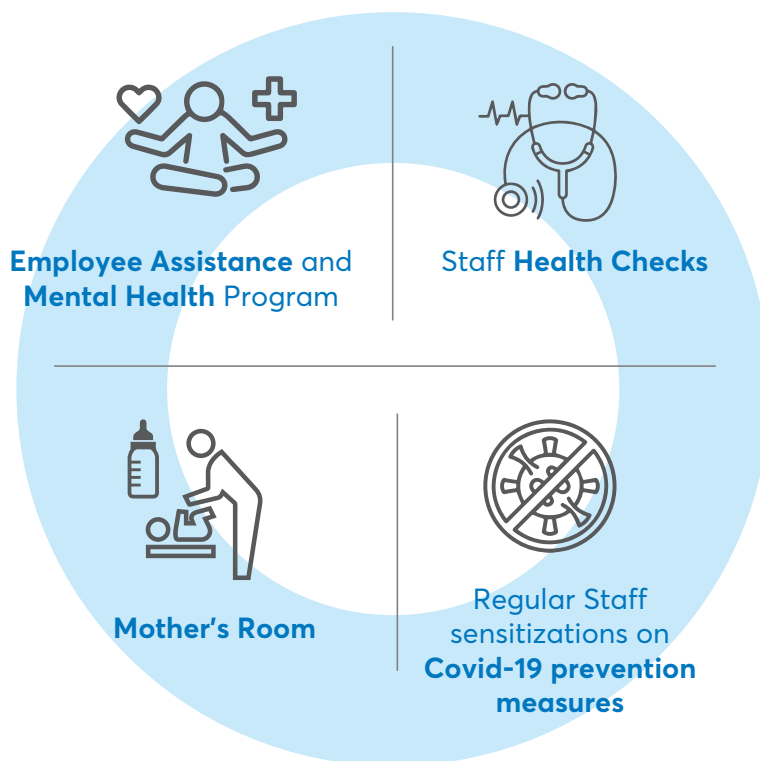

Employee Engagement

NCBA Bank Rwanda continues to provide engagement platforms for staff to ensure they get opportunities to give and get feedback. The following initiatives are paramount in facilitating for both top-down and bottom-up communication;

- Quarterly staff Town halls to update staff on progress made by the company and also provide staff with the opportunity to engage each other and with the Bank's leadership.
- Monthly departmental meetings to align on strategy and goals for each month.

Employee Wellbeing

At NCBA Bank Rwanda, we recognize that an attractive Employee Value Proposition should deliver a great employee experience that includes outstanding Wellness Programs. As a result, the Bank has the following employee wellness programs;

PEOPLE MANAGEMENT (continued)

Our health and well-being strategy sets out how we protect the health, safety and well-being of all employees, and customers; promote a healthy lifestyle and create long-term value.

COVID-19

In 2022, we adapted our Covid-19 strategy to address the severity of new variants early in the year before the pandemic began to subside.

We continued to develop a response based on protocols and prevention measures to ensuring the health of our employees, consistent with guidelines and recommendations from the health authorities.

We undertook a gradual process to normalize our operations and return to the office, cutting back our COVID-related measures strictly within the labor laws within Rwanda.

4. Performance Management

HR has ensured that there is a SMART Performance Management Process that is well designed, communicated and understood by staff through regular trainings and performance engagements. This process has been digitized through the SAP system to ensure company efficiency. The performance management process is also linked to the overall Business Strategy and is flexible enough to be broken further to cater for each specific department's strategy.

CITIZENSHIP PILLARS

NCBA Bank is committed to fulfilling its corporate social responsibility, which includes activities geared towards promoting the brand and improving the livelihoods of the societies it serves.

During the year 2022, the bank engaged in initiatives that helped uplift the community.

**SUSTAINABLE
DEVELOPMENT
GOALS**

HEALTH INITIATIVE PILLAR

One of the initiatives was providing community health insurance to 333 persons and their dependents who are survivors of the Genocide against Tutsi in Kayonza District.

This initiative took place on 8th May 2022 and aimed to improve the health and well-being of the beneficiaries. By providing access to health insurance, the bank ensured that the survivors and their families could access quality health care services, thus improving their quality of life.

In addition to the health insurance initiative, NCBA Bank also made a significant donation of 2 million Rwandan francs to the Kigali Genocide Memorial on 7th September 2022. The Kigali Genocide Memorial is an important memorial site in Rwanda that serves as a place of remembrance and learning for the 1994 Genocide against the Tutsi. The donation was aimed at supporting the ongoing efforts to preserve the memory of the Genocide and promote peace, unity, and reconciliation in Rwanda.

These initiatives are part of NCBA Bank's wider strategy to promote its brand and support the communities it serves. The bank recognizes the importance of engaging in activities that contribute to the social and economic development of the societies in which it operates. By providing health insurance to survivors of the Genocide against Tutsi and supporting the Kigali Genocide Memorial, the bank demonstrates its commitment to promoting the well-being of Rwandans and preserving the country's history and culture.

MANAGEMENT DISCUSSION AND ANALYSIS

REFLECTIONS FROM THE CHAIRMAN

**AMB. DR. BENJAMIN
M. RUGANGAZI**
CHAIRMAN

In 2022, we increased its geographical footprint with 2 new branches opened in central locations (Nyabugogo & Kayonza) with high commercial and retail activities. Expansion plans for our physical & digital reach across the whole of Rwanda are being implemented as we continue to bring services closer to our customers

Dear Shareholder,

It gives me great pleasure to present the 2022 Integrated Annual Report for NCBA Bank Rwanda PLC.

Our role as a commercial bank remains to create opportunities for both private and public business in Rwanda as well as enhance financial inclusion thereby improving the socio-economic status of Rwandans. During the year 2022, we remained committed to good, transparent, and compliant corporate governance.

Like the previous year, 2022 saw the global economy continue to wrestle with COVID-19 pandemic ripple effects followed up by the war in Ukraine, not to mention other geopolitical shifts in our immediate environment. These overlapping crises continued to trigger changes and redefine rules for businesses at large.

Delivering on our strategy

The above notwithstanding; NCBA Rwanda recorded commendable results during the year. The Bank continued its growth drive on the basis of our strategy: A strategy that pursues building a distinguished brand known for customer experience; scaling up retail banking; deepening NCBA leadership in corporate banking & asset finance and enabling digital transformation.

The results were highlighted in further strengthening of the balance sheet with our loan portfolio growing by 66% to RWF 87 Billion and deposits held for customers growing by 36% to RWF 96 Billion. In the same period, we reported significant improvement in the Return on Equity of 9.0% and Return on Asset of 1.5% - as a result of the record profit-before-tax (PBT) of RWF 4.9Bn realized during the year.

The Bank remains well capitalized with a Tier I & Tier II capital adequacy of 16.17% and 17.46%, while the funding position closed with a liquidity ratio of 47%.

In 2022, the Bank increased its geographical footprint with 2 new branches opened in central locations (Nyabugogo & Kayonza) with high commercial and retail activities. Expansion plans for our physical & digital reach across the whole of Rwanda are being implemented as we continue to bring services closer to our customers.

The Bank's continuous provision of innovative financial solutions for its diverse customer base

will continue to drive its asset finance product and enhance its digital channels to ensure a seamless customer experience. Through our digital transformation strategy, we have been able to serve more than 3.4 million customers through our MoKash product in partnership with MTN Mobile Money Rwanda (a wholly-owned subsidiary of MTN Rwanda), making us the largest bank by customer numbers proudly serving over 1 million women – hence further accelerating our financial inclusion objective.

In 2022, NCBA Bank Rwanda made a concerted effort to be fully integrated with the community we serve.

As part of this mission with the goal of providing vital services to local residents in need, during the 28th Genocide Memorial against the Tutsi, we took action to support the community in a meaningful way.

Specifically, we sponsored over 300 families' survivors of the genocide and their dependents, providing them with community healthcare for a full year. This initiative was designed to help alleviate the financial burden that healthcare costs can place on these families, allowing them to focus on healing and moving forward in their lives.

Later in the year, we had the honor of hosting the NCBA Group Chairman at our organization. During their visit, we took the opportunity to further our commitment to the community by visiting the Kigali Genocide Memorial. We were humbled by the experience, and proud to have the opportunity to contribute to this important site.

Through these actions, we demonstrated our dedication to fully integrating with the community we serve. We remain committed to this mission and look forward to continuing to find ways to support those in need within our community.

An outlook on 2023

Projections by the National Bank of Rwanda (NBR) of economic growth of more than 6% and potentially growing to pre-pandemic levels in 2023 are cause for optimism during this year 2023. The financial sector will certainly be a key driver of this growth.

we expect our operating results to improve further, backed by the execution of our growth agenda towards achieving sound, diversified, and sustained business development.

We expect competitive pressures to intensify in specific segments as other market players gear up on their value proposition, leveraging the latest technologies.

At NCBA Bank Rwanda, we expect our operating results to improve further, backed by the execution of our growth agenda towards achieving sound, diversified, and sustained business development. In an ever-evolving business environment, the Bank will continue to bolster its compliance, risk management, and internal controls frameworks to effectively cope with core and emerging risks while continuing to invest in our people who are the backbone of our organization.

Our board of directors

As of 31st December 2022, the Bank's Board of Directors was made up nine members: six independent Directors and three non-executive Directors. It is a diverse Board and this adds strength and synergy to its commendable oversight work.

Its oversight role and guidance together with support provided by the NCBA Group, the National Bank of Rwanda; the shareholders;

(REFLECTIONS FROM THE CHAIRMAN (continued)

and the Rwanda Bankers Association during the year have all undoubtedly contributed to the realization of these results and I express my deep appreciation. I commend the management team for achieving excellent results for the year.

Conclusion

In conclusion, I am grateful to our loyal customers who have placed their trust in NCBA Bank Rwanda. I look forward to working alongside both the internal and external stakeholders to drive the continued growth of the Bank through the widening of its customer base, as well as increasing the contribution of the Bank to the success of the Group as well as the development of the country's economy.

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

LINA HIGIRO
CHIEF EXECUTIVE OFFICER

We are proud to have built a business where the very best come to work each day excited to deliver on their personal goals and in turn the growth of our business.

Dear Shareholder,

2022 was a pivotal year. At a country level, Rwanda recorded a significant economic rebound with GDP growth of 29.9% (1) and an overall consumer price index increasing by 33.8 percent (2) on an annual basis – this was a result of the national government's efforts to bolster the economy from the effects of the pandemic effects and the impact of the Russia-Ukraine conflict.

Our performance

At NCBA Rwanda, 2022 also marked a watershed moment in our history. Our profit before tax was RWF 4.9Billion, significantly higher than RWF 232Million realized in 2021.

This performance was realized on the back of a diligent execution of our 5-year strategic plan. The key growth areas of our balance sheet were:

Total Assets closed at RWF 149.9Billion, a 53% increase compared to the prior year.

Loans and Advances increased by 66% year-on-year to RWF 86.8Billion.

Customer deposits grew by 36% to RWF 95.8Billion.

This performance is also reflected in our revenue growth. Operating income in 2022 was RWF 14.7Billion (82% above prior year). All revenue lines contributed to this outcome with significant growth in FX income to 1.73Billion – a growth of 98% year-on-year. Our net interest income also grew to 12.2Billion (from RWF 6.4Billion in the prior year)

On the digital front, our Mokash business continued to perform well above expectations and signaled that our commitment to financial inclusion is bearing fruit. Total digital disbursements for the year were RWF 61Billion, total retained deposits of RWF 6.9Billion, and the business had a bottom-line outcome of RWF 2.8Billion in Profit Before Tax.

The improvements in our financial performance resulted in a Return on Equity of 14%, up from 2.9% in 2021. Our Return on Assets also improved to 2.3%, from 0.5% in 2021.

To support our growth ambitions, NCBA Group shareholders injected additional capital of RWF 3.9Billion increasing the share capital to RWF 30.4Billion

(MESSAGE FROM THE CHIEF EXECUTIVE OFFICER (continued

Human Capital

We stayed true and committed to supporting the well-being and advancement of our employees.

During the year, we continued our Employee Assistance program, offering free mental health care support, revised our Maternity leave by offering a 2-month additional flexible-work benefit with an option to work half a day, and increased the paternity leave to 14 days from 4 days.

In line with our diversity and inclusion commitment, we embarked on a journey to acquire the Gender Seal in 2022 – a certification issued by the Gender Monitoring Office (GMO) and the Private Sector Federation (PSF), under the guidance of the United Nations Development Program (UNDP) & UN Women (United Nations Entity for Gender Equality and the Empowerment of Women).

In addition, each year we conduct annual surveys to gauge the effectiveness of all the people initiatives we undertake to improve the experience of the colleagues driving our business. In 2022, the outcome of the employee engagement survey highlighted an overall score index of 88 – which puts the Bank well above the global average standards. We are proud to have built a business where the very best come to work each day excited to deliver on their personal goals and in turn the growth of our business.

Strategy update

a. Branch expansion:

We are pleased to announce that we opened 2 new branches in the year in Nyabugogo & Kayonza. This brings our network to 5 branches across the country. During this strategic cycle, we are investing in continuing to grow our network to provide our customers greater access to our services, with a particular focus on deepening our accessibility in the capital city of Kigali.

b. Growing our SME & Retail portfolios

As a continuation of the focus areas in 2021, we maintained our journey to provide financing solutions for our Retail and SME Segment; a. to make homeownership more accessible through our "Mortgage 105" loan offering, and b. to provide the ability to acquire movable assets with our "Asset Finance" offering to a wider range of customers.

The impact was reflected in the growth of the retail loan portfolio by 85% compared to 2021, while our SME loan book grew by 43% in the same period – highlighting the untapped potential and growth opportunity for the Bank.

c. Enabling Digital Transformation:

During the year, we invested more than USD 2 Million in upgrading the core system running our Mokash digital services, to enhance the scalability and resilience of our platform. As a result of this investment, we now have 100% uptime on this critical platform, improved operational efficiencies, and are serving over 3.4 Million customers – a number that grows exponentially with each day.

Looking ahead – Outlook

The progress we have made over the last 3 years in accelerating our momentum and investing for growth gives me much confidence that we are on the path to building a business that can contribute substantially to the NCBA Group outcomes and meet shareholder expectations.

REPORT OF THE DIRECTORS (continued)

EVENTS SUBSEQUENT TO THE END OF THE REPORTING PERIOD

There is no material event that has occurred between the end of the reporting period and the date of this report.

DISCLOSURES TO AUDITORS

The directors confirm that with respect to each director at the time of approval of this report:

- i) there was, as far as each director is aware, no relevant audit information of which the company's auditor is unaware; and
- ii) each taken all steps that ought to have been taken as a director so as to be aware of any relevant audit information and to establish that the company's auditor is aware of that information.

TERMS OF APPOINTMENT OF AUDITORS

Ernst & Young Rwanda Limited were appointed in accordance with Regulation No. 14/2017 of 23/11/2017 on accreditation and other conditions for external auditors for financial institutions and have expressed willingness to continue in office.

By order of the board

8th March 2023

STATEMENT OF DIRECTORS' RESPONSIBILITIES

Law No.007/2021 of 05/02/2021 governing companies requires the directors to prepare financial statements for each financial year that give a true and fair view of the state of affairs of the Bank as at the end of the financial year and of its profit or loss. It also requires the directors to ensure that the Bank keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Bank. They are also responsible for safeguarding the assets of the Bank.

The directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable estimates, in conformity with International Financial Reporting Standards and the requirements of the Law No.007/2021 of 05/02/2021 governing companies. The directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Bank and of its deficit in accordance with International Financial Reporting Standards. The directors further accept responsibility for:

- i) Designing, implementing and maintaining such internal control as they determine necessary to enable the presentation of financial statements that are free from material misstatement, whether due to fraud or error;
- ii) Selecting suitable accounting policies and applying them consistently; and
- iii) Making accounting estimates and judgements that are reasonable in the circumstances.

Having made an assessment of the bank's ability to continue as a going concern, the directors are not aware of any material uncertainties related to events or conditions that may cast doubt upon the bank's ability to continue as a going concern.

The directors acknowledge that the independent audit of the financial statements does not relieve them of their responsibilities.

Approval of the financial statements

The accompanying financial statements were approved for issue by the Board of Directors on 8th March 2023 and signed on its behalf by

Director

RISK MANAGEMENT REPORT

RISK MANAGEMENT FRAMEWORK

Effective risk management and compliance with regulatory requirements is fundamental in achieving the Bank's strategic objectives. NCBA Bank Rwanda has adopted an enterprise-wide risk management framework in its journey of achieving its strategic plan. The NCBA risk management framework covers all systems, structures, policies, processes and people that and helps to identify, measure, evaluate, monitor, report and control or mitigate both internal and external sources of material risk. Both financial and non-financial risks that the Bank is facing are managed through the risk management framework.

The risk management framework is regularly reviewed in light of emerging risks arising from the changing business environment, better practice approaches and regulatory expectations. The ultimate responsibility for the establishment of effective risk management practices and culture lies with the Board, including the setting of the Bank's risk appetite and risk tolerance levels. However, the Board, through the Board Risk Management Committee has delegated the day-to-day responsibility for the establishment and monitoring of risk management practices across the Bank to the Enterprise Risk and Compliance Function.

This independent unit with right resources- Enterprise Risk Management and Compliance (ERM&C) is mandated to identify, measure and proactively manage threats and uncertainties that may come with all such risks with a view to protect against unforeseen losses, ensure earnings stability, reduce the possibility of failure and prevent the Bank from suffering unacceptable loss.

RISK MANAGEMENT STRUCTURE

The responsibility and accountability for risk management resides at all levels within the Bank, from the Board down through the organization to each bank officer. The approach taken regarding control of all financial and operational risks involves identification and assessment of the risks and control of compliance with risk-appetite limits stipulated in the various internal policies and procedures, through three lines of defense model:

The first line of defense consists of the business units, including supporting and operational departments that create or take risks. The management of the business lines bears the initial responsibility for routine risk management, aimed at managing risks while striving to achieve strategic goals and business objectives, within the established risk appetite and

in accordance with the internal risk regulations and regulatory directives.

The second line of defense consists of the Enterprise Risk Management and Compliance Department as a control function, which is independent of the business departments. This unit is responsible for conducting an independent risk identification and assessment; It also formulates methodologies for risk-assessment; avails different tools for risk management to first line of defense (e.g policies, procedures, models etc). In addition, the Enterprise Risk Management analyses the exposures from products and activities against the risk appetite and risk capacity limits established by the Board of Directors. They also conduct risk management culture awareness bank wide.

RISK GOVERNANCE PROCESS

	INTERNAL AUDIT	ASSURANCE PROVIDER
3RD LINE OF DEFENSE	Provide assurance that controls in place are adequate and appropriate Provide oversight on risk management process by second line of defense	
2ND LINE OF DEFENSE	Enterprise Risk Management and Compliance Establish policies and procedures Conduct an independent risk identification and assessment Risk Culture awareness	Standards setters ((Risk overseers
1ST LINE OF DEFENSE	Business, Operational and support functions Managing risks while striving to achieve strategic goals and business objectives, within the established risk appetite Comply with risk management process	Business Owners (Risk Takers & Owners

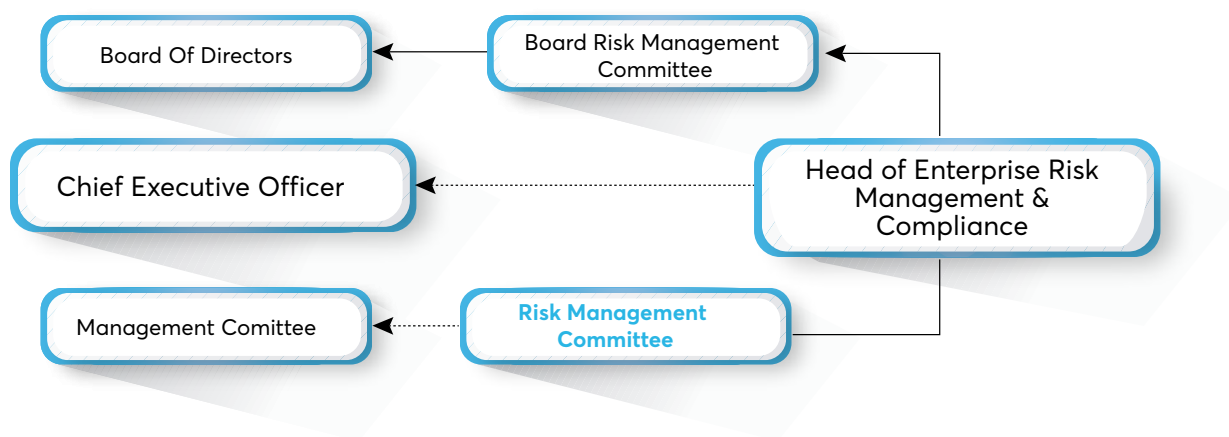

RISK MANAGEMENT REPORT (continued)

RISK MANAGEMENT REPORTING

A centralized control structure driven by the Enterprise Risk Management and Compliance (ERM & C) function is adopted for managing all the key risks within the Bank. This facilitates a holistic view of risk and improve the reporting and monitoring process. The ERM&C is an independent function reporting directly to the Board of Directors through the Board Risk Management Committee (BRMC).

The Senior Management also receive regular briefing on the Bank's risk profile directly from the ERM & C function. The ERM & C function oversees all activities related to risk management within the Bank. ERM&C assists management to effectively deal with all uncertainties and associated risks and opportunities in the process of enhancing the capacity to build value.

NCBA BANK RWANDA RISK APPETITE

Risk appetite reflects the maximum level of risk that the Bank is prepared to accept as it pursues its business objectives. NCBA's risk appetite statement adopts a top-down approach by providing an overall framework within which NCBA's various units and departments should incur risk in their day-to-day activities.

In each department within NCBA, the relevant risk activities such as identification, measurement, management, applicable limits and monitoring are documented in detailed policies, policy guidelines and procedures

The Board of Directors, through the Board Risk Management Committee (BRMC) is responsible for

ensuring that the risk appetite inherent in the overall business model (including the business strategy and its execution process) of the Bank.

BRMC and management regularly (at least quarterly) reviews the level of risk undertaken by the Bank and assesses this against the target quantitative and qualitative risk metrics defined in the risk appetite.

In reviewing the risk appetite, BRMC and Management takes into consideration any loss events, limit breaches, historical defaults, sector developments, stress test results and business intelligence obtained within the period under consideration.

RISK MANAGEMENT PROCESS

NCBAR implements the following aspects of the risk management process:

a) *Risk Identification Process*

Identification of risk consists of using management techniques or processes to determine if one or more risks exist in a type of product, service, system or competitive strategy. Risks are identified using different methods and some of the risk assessment methodologies are Incident Management (Internal/External Data Collection Analysis), Risk Control Self-Assessments (RCSAs), Key Risk Indicators (KRIs) and Audit/Forensic findings, Business Process Mapping, Scenario Analysis and Stress testing.

b) *Risk Measurement*

The existing risk measurements of the Bank are quantitative and qualitative in nature. Business area's risk readiness is measured to provide an indication of its readiness in taking on new risks taking into consideration the control environment.

Risks are rated in terms of their inherent risk value and residual risk value on associated business objectives with risk ratings broken into 'High', 'Medium' or 'Low'. Relevant scorecards are also prepared from the information contained in the different risk profiles. These scorecards provide a means of translating qualitative risk assessment information into graphic summaries of risk profiles.

c) *Risk Monitoring*

Risk monitoring consists of Board and Management directed processes whereby controls and systems are implemented. To implement effective risk monitoring, the Board of Directors and Management have established policy standards or benchmarks for risk tolerance.

d) *Risk Reporting and Oversight*

The Enterprise Risk Management & Compliance Function reports risk and compliance issues on a risk graduated scale to management through the respective management committees and a summary quarterly report to BRMC.

Certain types of risks occur as a result of unexpected events or incidents (e.g., earthquake, pandemic, internal theft, or robbery). Although these types of risks are not part of everyday operations, they still require pre-planning and in certain instances, alerts / early warning systems are monitored to protect the Bank, its customers and staff.

e) *Risk Treatment/Response/Mitigation*

After risks have been identified and appropriate matrix and controls have been implemented, management determine the best method of treating a particular risk — whether to retain it or transfer it. Generally, the Bank will opt to insure potential losses that are relatively predictable and not severe.

RISK MANAGEMENT REPORT (continued)

RISK MANAGEMENT TOOLS AND STAFF AWARENESS

The following are the key risk management tools that NCBAR has deployed:

- Incident Reporting
- Key Risk Indicators (KRIs)
- Staff Awareness
- Limits
- Policies and Procedure manual
- Risk and Control Self Assessments (RCSAs)

The Bank ensures there is program of continuous awareness training for all staff on both risk management processes of the Bank and regulatory requirements with a view of consistently improving the risk culture.

BANK'S RISK MANAGEMENT PROGRAM

1. Credit Risk

- Credit Risk refers to the current or prospective risk to earnings and capital arising from a customer's failure to meet the terms of any contract with the Bank or to otherwise fail to perform as agreed. The largest source of credit risk is loans, but it exists throughout the other activities of the Bank both, on and off the balance sheet. Credit risk arises any time Bank

funds are extended, committed, invested, or otherwise exposed through actual or implied contractual agreements.

- NCBAR has a Board approved Credit Risk Management Policy that incorporates the credit risk management framework. The Bank manages and measures credit risk through a variety of processes and tools, the key ones are as follows:

CREDIT RISK MANAGEMENT		
RISK APPETITE <ul style="list-style-type: none"> • Overall limits for business lines • Single exposure limits • Economic sector exposure limit • Product limit 	RISK IDENTIFICATION, MEASUREMENT AND ASSESSMENT <ul style="list-style-type: none"> • Portfolio analysis • Credit rating assessments for corporate, SME and Retail clients • Periodic credit risk reviews 	MITIGATION / CONTROLS <ul style="list-style-type: none"> • Portfolio analysis • Credit rating assessments for corporate, SME and Retail clients • Periodic credit risk reviews

RISK MANAGEMENT REPORT (continued)

2. Market Risk

Market Risk refers to the risk of loss arising from adverse fluctuations in exchange rates, interest rates and commodity and equity prices. This includes adverse impact of cross currency spreads. The Bank's strategy is to run liquidity mismatches within the approved risk appetites by attracting affordable and diversified funding and providing lending products in different currencies as tailored to the needs of customers.

Market Risk exposures arising from the trading book are managed by the Global Market department through the ALM (Asset and Liability Management) process handled by the Asset and Liability Committee (ALCO). Market Risk measurement and oversight is conducted by the Enterprise Risk Function.

The relevant market risks the Bank is currently facing are:

- Foreign Exchange Risk (FX Risk)
- Interest Rate Risk in the Banking Book (IRRBB)
- The Bank employ the following principles in order to measure, monitor and control market risk exposures:
 - Identification of market risks in the trading and investment books
 - Measurement and management of market risk
 - Breach management
 - Risk appetite specification in terms of limits and triggers

3. Operational and Transaction Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, systems or people or from external events. It includes the risk that potential inadequate information systems, technology failures, breaches in internal controls, fraud, unforeseen catastrophes or other operational problems may result in unexpected losses. This risk is inherent in all Bank products and services and arises on a daily basis as transactions are processed. All Bank products and all divisions within the Bank are affected by operational / transaction risk.

Operational Risk Controls and Mitigation

NCBA has a well-defined Risk and Control Self-Assessment (RCSA) process whereby operational risks that are inherent in a Business Unit's strategy, objectives and activities are identified by Management and the effectiveness of the controls over those risks evaluated and monitored on a regular basis.

The risks are categorised into the following four causal categories:

- **Process** – Process failure caused through design, non-existence and lack of integration, lack of ownership or validation.
- **People** – People failures caused by workplace injury, competency, non-compliance / negligence, weak organisational culture, dishonesty, override or incapacity issues

• **Systems** – System failure caused through obsolescence, capacity constraints, stability, system security, scalability, misaligned infrastructure or functionality issues (resulting in e.g. system malfunction, transaction processing errors, unavailability, security breaches etc.)

• **External** – Failures or inadequacies caused by external parties, damage to physical property or assets or by any other external event. (E.g. third party suppliers, outsourcing, external systems failure, criminal activities, catastrophes, regulatory changes, competitor actions or sovereign/political issues.)

Through the RCSA process, remediation actions are identified to address the likelihood / impact to the Bank of the risk occurring. Identified causal factors direct the formulation of appropriate action plans and controls to mitigate risks.

The Bank then uses Basel II Risk event category model to classify events arising from these causal factors into: -

- Internal Fraud
- External Fraud
- Clients, Products and Business Practices
- Physical Assets and Infrastructure
- Execution, Delivery and Process Management
- Employment Practices and Workplace Safety
- Business Disruptions and System Failures.

BANK'S RISK MANAGEMENT PROGRAM (continued)

4. Liquidity risk

Definition

Liquidity risk is defined as the risk to an institution's earnings or capital arising from its inability to meet its obligations as and when they fall due without incurring significant costs or losses. Liquidity stress can lead to financial distress or even insolvency. The primary aspect of Liquidity Risk is the risk that the Bank is unable to meet its financial obligations as they fall due. These obligations include the repayment of deposits on demand or at their contractual maturity, the repayment of borrowings and loan capital as they mature, the payment of operating expenses and taxation, the payment of dividends to shareholders and the ability to fund new and existing loan commitments.

NCBA Rwanda applies the following liquidity management principles:

(i) Short - Medium Term Liquidity Mismatch Management

The mismatch approach measures the Bank's liquidity by assessing the mismatch between its inflow and outflow of funds within different time bands on a maturity ladder. Maturity mismatches are prepared on both a contractual maturity and a behavioural adjusted basis

(ii) Net Stable Funding Ratio (NSFR)

The Net Stable Funding Ratio promotes resilience over a longer term by ensuring the Bank funds its assets with more stable sources of funding on an ongoing basis. NSFR is a proportion of available amount of stable funding to required amount of stable funding and the Bank is required to maintain an NSFR ratio of more than 100%. The ratio is monitored on a weekly basis and reported to ALCO monthly.

(iii) Liquidity Contingency Planning (LCP)

NCBAR has a contingency funding plan designed to mitigate the risks identified during the liquidity stress testing. The contingency funding plan includes early warning indicators which span both Bank specific and systemic crises and indicators must be monitored based on assigned frequencies and agreed tolerance levels. Indicators are in turn tied to escalation procedures.

5. Strategic Risk

Definition

Strategic risk is defined as the current and prospective impact on earnings or capital arising from adverse business decisions, improper implementation of decisions or lack of responsiveness to industry changes. It is a risk that could significantly impact on the achievement of the institution's vision and strategic objectives as documented in the strategic plan.

NCBAR makes use of a scorecard to assess its strategic risk based on certain measurable indicators. The scorecard defines individual risk factors which are measured against a mix of qualitative and quantitative parameters. Risk weights are assigned to each category of risk factors to arrive at the overall strategic risk score.

Strategic Risk Controls and Mitigation

(i) Strategic Planning

The Bank uses an integrated strategic planning and performance measurement system, the 'balanced scorecard' that:

Communicates with clarity bank's vision, mission and strategy to all its stakeholders

Aligns day to day work to the vision and mission

Provides a framework for prioritisation of programs and projects

Uses strategic performance measures and targets to evaluate and measure progress

(ii) Strategic Budgets

The strategic budgets convert the qualitative strategic plans into financial forecasts. Business growth figures are validated against macroeconomic fundamentals such as GDP growth rates, inflation, strategic initiatives and their impact on the budgets. They also ensure key regulatory ratios such as Return on Risk Weighted Allocated Capital (RoRIWAC), Liquidity ratio, Core Capital to Deposit ratios are in compliance with the regulations.

RISK MANAGEMENT REPORT (continued)

BANK'S RISK MANAGEMENT PROGRAM (continued)

6. Reputational Risk

Reputation risk is the potential that negative publicity regarding the Bank's business practices, whether true or not, will cause general harm on customer base, lead to costly litigation, or revenue reductions, often as a result of poor earnings, regulatory censure, significant fraud or litigation.

The Bank is keen on upholding Board/Management integrity, staff competence, professional corporate culture, sound risk management, the control environment, financial soundness, business viability, ethical business practices, customer satisfaction, consumer protection, legal / regulatory compliance and proper crisis management which may positively or negatively impact the Bank's reputation

To protect the Bank against loss of business or legal action as a result of an activity, action or stance taken by NCBA or its officials which will impair its image in the community and the long-term trust placed in the organization by its stakeholders.

Reputational Risk Controls and Mitigation

The Bank has no appetite for Reputational Risk as such has no appetite for adverse media coverage and uses every effort to ensure that events that could potentially lead to such coverage are avoided.

NCBAR has implemented a Reputational Risk Management framework to ensure continuous Reputational Risk identification, assessment, treatment and control. The framework has three components as detailed below:

Corporate Governance – Having a clear, working and effective Governance Structure and practices, which include setting personal "tone-at-the-top" by the Bank's Board and Senior Management.

Reputational Risk management – The Bank has devised an influential process to identify, assess, monitor, report Reputational Risk for Board and Senior Management control.

Management of Reputation events – A swift and working proactive organization and response structure to respond to events and drivers posing a direct threat to the brand's reputation.

7. Regulatory Compliance Risk

Regulatory risk refers to the risk to earnings or capital arising from violations of or non-conformance with laws, rules, regulations, prescribed practices, or ethical standards issued by the regulators from time to time. Regulatory risk also arises in situations where the laws or rules governing certain Bank products or activities of the Bank's clients may be ambiguous or untested. This risk exposes the Bank to fines, civil money penalties, payment of damages, and the voiding of contracts. It can lead to a diminished reputation, reduced franchise value, limited business opportunities, lessened expansion potential, and lack of contract enforceability.

The Bank has put in place a compliance policy to assist in defining the applicable standards, principles and guidelines in this process. NCBAR has zero tolerance for non-compliance and requires all staff to comply fully to all laws, regulations, rules, policies and procedures. The various management organs are responsible for the implementation of the compliance risk management process.

Compliance Risk Assessment

The Bank's attitude on Compliance Risk Management is based on the following six principles:

The Bank's reputation, social responsibilities and commitment to customers means that it must exhibit the highest standards of integrity.

Complying with regulatory standards is critical to success.

The Bank will achieve its strategic objectives by embedding compliance in daily business activities.

Compliance is the responsibility of all staff of NCBAR.

RISK MANAGEMENT REPORT (continued)

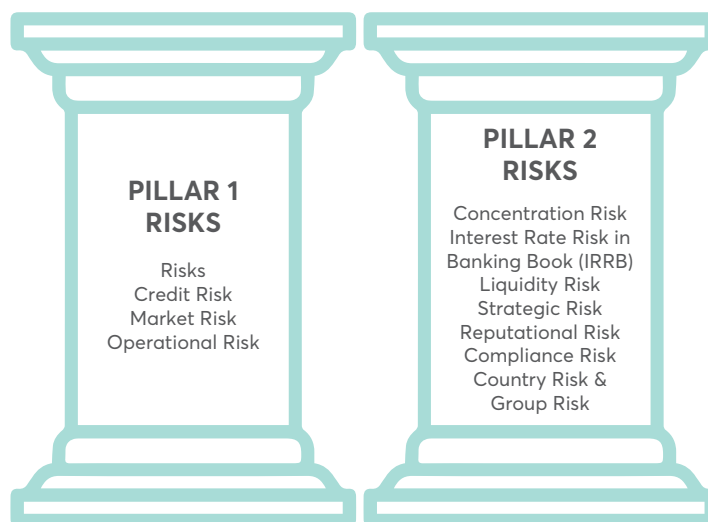

BANK'S RISK MANAGEMENT PROGRAM (continued)

8. Risk Management and Capital Adequacy

Regulatory risk refers to the risk to earnings or capital arising from violations of or non-conformance with The Bank monitors its capital adequacy level against the minimum regulatory capital requirements on a continuous basis in addition to reviewing its internal capital requirements through the Internal Capital Adequacy Assessment Plan and Internal Liquidity Adequacy Assessment Plan.

In this process, the Bank identifies all its material risks and allocates capital to these risks in line with BNR requirements on ICAAP.

The Board of Directors and Senior Management continuously review the strategic direction of the Bank annually and periodically to ensure appropriate measures are implemented timely where necessary. The annual strategic plan of the Bank is approved by the Board of Directors.

The following table summarizes the risk type, internal control tools and capital adequacy approach adopted to assess the level of risk and the potential capital charge impact under ICAAP.

1	Credit Risk	Risk Policy & Procedures	Standardized Approach
2	Market Risk	Risk Policy & Procedures	Standardized Approach
3	Operational Risk	Risk Policy & Procedures	Basic Indicator Approach
4	Concentration Risk	Risk limits	Internal Model Approach
6	Liquidity Risk	Risk policy & Procedures, Contingency Funding Plan	Internal Model Approach
7	Interest Rate Risk on the Banking Book (IRRBB)	Risk Policy & Procedures	Repricing Gap Analysis
8	Strategic Risk	Strategic Risk Framework	Scorecard, ROE deviations
9	Reputational Risk	Reputational Risk Framework	Reputation Events, Social Media management
10	Country Risk	Monitoring of Exposures	Country Risk Assessments
11	Compliance Risk	Monitoring of laws, regulations, limits, Policy & Procedures	Detailed check lists and compliance reviews
12	Group Risk	Monitoring of Exposures	Risk Assessments

RISK MANAGEMENT REPORT (continued)

BANK'S RISK MANAGEMENT PROGRAM (continued)

9. Stress Testing Framework

Stress Testing is a risk management technique performed by NCBA Rwanda to evaluate the potential effect on its financial conditions of a specific event and/or adverse movement in a set of financial variables. The Bank performs rigorous and forward-looking stress tests that identify plausible severe loss events or adverse changes in market conditions and assess their impact on the Bank's capital adequacy.

The Bank uses results of the stress tests to institute remedial actions when capital adequacy and or

profitability is adversely impacted. The following are the other uses of stress testing results in NCBAR:

- Establishing the overall risk appetite for the Bank;
- Setting the Bank's risk tolerance levels;
- Facilitating the development of risk mitigation and contingency plans across a range of stressed conditions; and
- Capital allocation to absorb potential losses if worst case scenarios materialize.

10. Information and Cyber Security

Cyber risk is the risk of damage, including disruption, disturbance, shut down of operations, theft of information assets, collection of intelligence, or damage to reputation or the confidence of the public as a result of a cyber event.

The sophistication and severity of cyber-attacks on the global financial sector have grown in recent years. NCBA Rwanda recognize that today's bank robbers, however, are based anywhere in the world, depleting bank accounts from a computer, using online tactics like malware, ransomware, and stolen credentials to access the funds. As more people rely on online or mobile financial transactions and use cashless payment options, NCBA Bank Rwanda recognize that strong cybersecurity is necessary to protect customer assets by protecting the Bank's networks, software, devices and data from attacks. Cyber threats also pose a significant risk for the Bank in the delivery of best-in-class services to its customers, while ensuring regulatory and

compliance requirements are met. The Bank has put in place the Information and Cyber Security Policy which establish a framework through which cyber risks are effectively managed, through identification, protection, detection, response and recovery against cyber threats.

NCBA Rwanda also observes other best practices for information and cyber-security, such as principles of ISO 27001 on requirements for the implementation of information security controls, and on ISO 27002, which "provides guidelines for organizational information security standards and management practices, including the selection, implementation and management of controls taking into consideration the organization's information security risk environment(s)." The Bank also complies with the requirements of the Payment Card Industry Data Security Standards (PCI-DSS).

11. Business Continuity Management

NCBA Bank recognizes that in today's world, financial institutions are exposed to numerous disruptive events that may halt the smooth service delivery; many businesses fail as the result of an unexpected crisis. Hence, managing risk and planning for business continuity in case of a disruption remain part of its daily business management

In order to ensure timely and appropriate resumption of critical processes, regardless of the scope or scale of the disruption, NCBA Rwanda has put in place a Business Continuity Policy providing the policy standards and guidelines for Business Continuity Planning (BCP) and Disaster Recovery Plan (DRP).

BCP and DRP are applicable for a wide range of critical business processes and, therefore the Bank has recognized the need for a bank-wide coordinated action to ensure consistent compliance with the policy standards.

Each critical business unit and business process owners to maintain a current business impact analysis and business continuity plans to ensure adequate resources and structures are in place

With a view to ensure that all stakeholders' interests are protected from incidents likely to cause operational disruptions, the Bank has developed and

BANK'S RISK MANAGEMENT PROGRAM (continued)

maintained a BCM infrastructure. These facilities and the related management response logistics in the BCP are regularly tested and updated to ensure that they always remain adequate to facilitate a cost-effective containment of potential business disruptions in order to continue business operations at an acceptable pre-defined level, quick recovery of operations after any disruption and above all, the preservation of human life.

12. The Money Laundering (ML) and Terrorism Financing (TF) risks

The Bank recognizes that Money Laundering (ML) and Terrorism Financing (TF) risks are real and that measures to mitigate against these risks are vital to the achievement of its strategic objectives. Money laundering and terrorism financing are recognized as criminal activities globally. NCBA has a zero-risk appetite to money laundering and terrorism financing and will not support or tolerate money laundering, its predicate offences or terrorism financing.

The Bank, through its AML & CFT policy, has implemented a robust AML and CFT compliance program aligned to international best-practice which applies to all its operations.

The Bank has put in place robust IT systems, processes and procedures to prevent persons engaged in money laundering, terror financing, fraud, tax offences, or other financial crimes, from exploiting the Bank's operations and infrastructure.

NCBA Staff are regularly trained on money laundering (ML) and terrorism financing (TF) risks and how they can identify, assess and manage that risks when they are executing their daily operations.

13. Environmental, Social and Governance (ESG) Risk

NCBA Rwanda believes that effective management of environmental, social and governance risks and potential impacts is not only sound business practice but, when correctly implemented, can also reduce waste, improve profitability and generate goodwill and positive benefits in the communities where the Bank operates.

NCBA Rwanda recognizes that as a financial institution, it is most significant environmental risk may arise indirectly from the environmental impact of third parties such as its customers, investments and business partners. Although NCBA cannot prescribe environmental management policies to its clients, it encourages sound environmental management by its customers and other stakeholders.

The Bank strives to ensure, through its environmental and social appraisal and supervision process that the investments and lending it undertakes are environmentally and socially sustainable and are designed to minimize pollution and maximize resource efficiency

The Bank assesses potential environmental, social and governance risks and impacts of all proposed investments for compliance with Rwanda laws, regulations and internal policies. The Environmental and Social risk management risk framework is stipulated in the Bank's Environmental and Social Risk policy which conforms to different international standards.

NCBA Rwanda recognizes that the lending decisions it takes and its relationship with customers impacts both the environment and the community. Before lending, the Bank ensures that:

- Lending proposals include a consideration of environmental and social issues where appropriate;
- All financing proposals take into account locally acceptable environmental and social standards, local laws and regulations in Rwanda;
- The risks associated with both environmental and social issues related to the Bank's business will be properly recognized, evaluated and mitigated or transferred as appropriate.

Within the Bank, the following ESG risk are monitored closely:

a) Labor - The Bank has adopted HR policies that conform to local labor laws, regulations and international labor practices in areas of occupational health and safety, labor rights, accessibility for persons with disability, discrimination and gender bias and will actively

RISK MANAGEMENT REPORT (continued)

BANK'S RISK MANAGEMENT PROGRAM (continued)

13. Environmental, Social and Governance (ESG) Risk

review its customers and business partners, to encourage compliance.

b) Resource Management - NCBA recognizes that resources are limited and commits to apply resource management strategies in its activities and operations to increase productivity, minimize wastage and ensure efficient utilization of resources.

c) Waste Minimization - NCBA reviews its operations and business activities to facilitate conscious behavior towards waste minimization and disposal and encourage activities that reduce, reuse or recycle waste.

d) Financial Inclusion - NCBA invests in new technologies that take cognizance of emerging trends, which present new opportunities and offer financial inclusion opportunities.

e) Greenhouse Gas Emissions Reduction - NCBA reviews its operations and business activities and identify opportunities to reduce harmful GHG emissions in its operations, those of its customers and business partners and support solutions created to help reduce or eliminate harmful GHG emissions, improve efficiency, minimizing transportation, increasing the use of clean fuels etc.

f) Ecosystem Conservation - NCBA promote wildlife and habitat conservation through cooperative efforts with communities, scientific and academic communities and organizations committed to preserving the biodiversity and ecosystem of the countries where it operates.

g) Employee Awareness and Engagement

The Bank identifies and formulates mechanisms for involving employees in the realization of the Bank's environmental strategy through awareness-raising campaigns to ensure that environmental and social considerations are practiced by employees at all levels and throughout the entire organization.

All employees are actively engaged in setting up, implementing and championing the Bank's environmental management strategies through the establishment of green teams, green ambassadors, green coordinators, volunteers etc.

NCBA supports employees participating in community volunteer programs, which have environmental and social objectives and outcomes.

OUR APPROACH TO CONSUMER PROTECTION

Strategy Pillar 1: Become a Distinguished Brand Known for Customer Experience

Providing the best customer experience

Protecting privacy and personal data and using them appropriately

Embedding consumer protection principles in our practices

Consumer Protection Strategies Implemented:

Throughout the year, we have adopted several consumer protection strategies to enhance transparency, promote responsible practices, and provide adequate safeguards to our customers. These strategies include but are not limited to:

Improved disclosure mechanisms to ensure clear and comprehensive information is provided to consumers.

Translating documentation into the three legal languages (English, French & Kinyarwanda) to empower customers to make informed decisions.

Enhanced risk management frameworks to identify and mitigate potential consumer risks.

Compliance with Consumer Protection Laws and Regulations:

We have placed significant emphasis on compliance with consumer protection laws, regulations, principles, and practices. Our dedicated compliance team ensures adherence to all relevant requirements, and we regularly review and update our policies and procedures to align with the evolving regulatory standards.

Consumer Satisfaction Survey:

We believe in continuously evaluating and improving our services based on customer feedback. In 2022, we conducted continuous consumer satisfaction surveys to gauge customer sentiment and identify areas for improvement. The results revealed an overall Customer Effort Score (CES) of 97%, Net Promoter Score of 78% and SLA Adherence score of 80%, suggesting that our

organization has successfully aligned its processes and services with the needs and preferences of our customers.

Fair Complaints Handling Indicators:

We value every consumer's feedback and take complaints seriously.

We have implemented fair complaints handling indicators to ensure timely and effective resolution of customer complaints. These indicators include streamlined complaint escalation procedures, dedicated complaint resolution teams, and continuous monitoring of complaint resolution timelines. Some of the initiatives to that effect were:

The implementation of "Intumwa Chatbot" in partnership with the National Bank of Rwanda as a way to efficiently communicate and lodge complaints in a fast and efficient manner.

The publication of tariffs and service charter in our branch locations

Capacity Building Implementation and Plans:

Recognizing the importance of knowledge and expertise, we have focused on capacity building and trainings for our senior management team during the year to enhance their understanding of consumer protection regulations, best practices, and emerging trends.

In 2023, we plan to further cascade the capacity building session to staff at all levels.

RISK MANAGEMENT REPORT (continued)

OUR APPROACH TO CONSUMER PROTECTION (continued)

Key Consumer Protection Developments and Outlook:

We have closely monitored and adapted to key consumer protection developments throughout the year. Some notable developments include [specific developments]. Looking ahead, we remain committed to staying abreast of emerging consumer protection trends and will continue to enhance our strategies and practices accordingly.

Organizational Cultural Transformation Indicators:

We recognize that fostering a fair and consumer-centric culture is crucial. During the year, we implemented various indicators to assess our organizational cultural transformation towards fair treatment of consumers. These indicators include:

Regular training sessions on ethical conduct, integrity, and customer-centric behavior.

Incorporation of consumer protection principles in our employee performance evaluation processes.

Encouraging open communication channels to address consumer concerns and feedback

OUR STRATEGY & VALUE
CREATION MODEL

GOVERNANCE

FINANCIAL STATEMENTS
NOTES &

OUR FINANCIALS

INDEPENDENT AUDITORS REPORT TO THE SHAREHOLDER OF NCBA BANK RWANDA PLC

Report on the Audit of the Financial Statements

OPINION

We have audited the financial statements of NCBA Bank Rwanda Plc (the "Bank" or " Company) which comprise the statement of financial position as at 31 December 2022, and the statement of profit or loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2022, its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) and the requirements of the Law No. 007/2021 of 05/02/2021 governing companies.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report. We are independent of NCBA Bank Rwanda Plc in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Rwanda, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

INDEPENDENT AUDITORS REPORT (CONTINUED) TO THE SHAREHOLDER OF NCBA BANK RWANDA PLC

Report on the Audit of the Financial Statements

KEY AUDIT MATTER

We identified the audit of expected credit losses (ECL) as a key audit matter considering the following:

Bank's loan and advances to customers are material to the financial statements;

The high degree of estimation uncertainty, significant judgements and assumptions applied in estimating ECL on loans and advances to customers, IFRS 9 requires the Bank to recognise expected credit losses ("ECL") on financial instruments which involves significant judgement and estimates;

The key areas where we identified greater levels of management judgement and therefore increased levels of audit focus in the Bank's implementation of IFRS 9 are:

Economic scenarios – IFRS 9 requires the Bank to measure ECLs on a forward-looking basis reflecting a range of future economic conditions.

Significant increase in credit risk ("SICR") and default rate – management determines the categorization (staging) of individual loans and advances using both qualitative and quantitative criteria to determine significant increase in credit risk ("SICR") and default rate. This is a key area of judgement since it determines whether a 12 month or lifetime PD is used.

Model Assumptions – inherently judgemental modelling is used to estimate ECL which involves determining probabilities of default ("PD"), loss given default ("LGD"), and exposures at default ("EAD"). The PD models used in the personal, business and corporate portfolios are the key drivers of the Bank's ECL results and are therefore the most significant judgemental aspect of the Bank's ECL modelling approach.

Qualitative adjustments – management adjustments to the model driven ECL results are raised by management to address known impairment model limitations or emerging trends.

The effect of these matters is that, as part of our risk assessment, we determined that the impairment of loans and advances to customers to be a key audit matter due to the high degree of estimation uncertainty and significant management judgement involved in determination of ECL.

- Our audit focused on the significant areas of judgements and estimations that could result in material misstatements in the financial statements. These procedures in this area included, among others:

- We evaluated the appropriateness of the Banks's methodology for determining ECL and evaluated the methodology against IFRS 9;

- Performing end to end process walkthroughs to identify the key systems, applications and controls used in the ECL processes;

- We determined how the bank extracts 'days past due (DPD)' used in staging of the loans and advances into three stages as per IFRS 9 requirements;

- We evaluated judgements applied by the bank in staging of loans and advances;

- Assessing key variables used in determining probabilities of default (PDs), loss given default (LGD) and exposures at default (EAD)

- To ensure that all deteriorated loans are discussed in the appropriate committees and at the board level

- For LGD, we tested the timing of cash flow based on empirical evidence, we also agreed values used in LGD to external valuer reports.

- We tested the completeness and accuracy of the historical data used in deriving PDs, LGDs and EAD and recalculated outcomes on a sample basis.

- We tested on a sample basis, the reasonableness of EAD for both on and off balance sheet exposures;

- On a sample basis, testing the key inputs and assumptions impacting ECL calculations to assess the reasonableness of economic forecasts, weights, and PD assumptions applied including key aspects of the Bank's SICR determinations and assessing model predictions against actual results; and

- Assessing whether the disclosures appropriately disclose and address the uncertainty which exists when determining the expected credit losses and the key judgements and assumptions made were sufficiently clear.

INDEPENDENT AUDITORS REPORT (CONTINUED) TO THE SHAREHOLDER OF NCBA BANK RWANDA PLC

Report on the Audit of the Financial Statements

OTHER INFORMATION

The directors are responsible for the other information. The other information comprises the information included in the document titled "NCBA Bank Rwanda plc Financial Statements for the Year ended 31 December 2022 which includes the Directors' Report as required by No Law No. 007/2021 of 05/02/2021 governing companies. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

INDEPENDENT AUDITORS REPORT (CONTINUED) TO THE SHAREHOLDER OF NCBA BANK RWANDA PLC

Report on the Audit of the Financial Statements

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

As required by the Law No. 007/2021 of 05/02/2021 governing Companies,

We confirm that:

- i) We have no relationship, interests and debts in the company;
- ii) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- iii) In our opinion, proper books of account have been kept by the company, so far as appears from our examination of those books;
- iv) We have communicated to you through the management letter, internal control weaknesses identified in the course of our audit including our recommendations with regard to those matters.

ABOUT THIS REPORT

OUR CORPORATE PROFILE

OUR STRATEGY & VALUE CREATION MODEL

GOVERNANCE

FINANCIAL STATEMENTS NOTES &

NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 December 2022

1. Corporate Information

NCBA Bank Rwanda Plc is incorporated Under the Law No.007/2021 of 05/02/2021 governing companies. The Bank is a financial institution licensed to provide corporate and retail banking services to corporate, small and medium size enterprises and retail customers in various parts of Rwanda. The Bank is a limited liability bank incorporated and domiciled in Rwanda. The Bank has its registered office at Kigali Heights, Plot No. 772, P. O. Box 6774, Kigali, Rwanda. NCBA Group is the ultimate parent registered and domiciled in Kenya.

2. Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of preparation

The financial statements have been prepared on a historical cost basis. The carrying values of recognised assets and liabilities that are hedged items in fair value hedges, and otherwise carried at amortised cost, are adjusted to record changes in fair value attributable to the risks that are being hedged, and when relating to portfolio fair value hedges, are recognised on a separate line of the statement of financial position. The financial statements are presented in Rwandan Francs (Frw) which is the bank's functional and presentation currency and all values are rounded to the nearest thousand (Frw'000) except where otherwise indicated.

The Bank has prepared its consolidated financial statement on the basis that it will continue to operate as a going concern.

2.2 Statement of Compliance

The financial statements are prepared in accordance with the International Financial Reporting Standards and Regulation No. 28/2019 of 09/09/2019 on Publication by Banks of Financial Statements and Other Disclosures. The financial statements are presented in Rwandan francs (Frw) rounded to the nearest thousand.

2.3 Presentation of financial statements

The Bank presents its statement of financial position in order of liquidity based on the Bank's intention and perceived ability to recover/settle the majority of assets/liabilities of the corresponding financial statement line item. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in the notes

2.4 Changes in accounting policies and disclosures

New and amended standards and interpretations

The Bank has applied for the first time, certain standards and amendments, which are effective for annual periods beginning or after 1 January 2022. The bank has not adopted any other standard, interpretation or amendment that has been issued but not effective. The bank adopted the requirements of 'Interest Rate Benchmark Reform – Phase 2 Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16' (IBOR reform Phase 2), although these new standards and amendments applied for the first time in 2021, they did not have a material impact on the annual financial statements of the bank. The nature and the impact of each new standard or amendment is described below:

The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

The amendment was intended to apply until 30 June 2021, but as the impact of the Covid-19 pandemic is continuing, on 31 March 2021, the IASB extended the period of application of the practical expedient to 30 June 2022.

Amendments effective and adopted in the current year

Reference to the Conceptual Framework – Amendments to IFRS 3

In May 2020, the IASB issued Amendments to IFRS 3 Business Combinations - Reference to the Conceptual Framework. The amendments are intended to replace a reference to the Framework for the Preparation and Presentation of Financial Statements, issued in 1989, with a reference to the Conceptual Framework for Financial Reporting issued in March 2018 without significantly changing its requirements.

The Board also added an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 or IFRIC 21 Levies, if incurred separately.

At the same time, the Board decided to clarify existing guidance in IFRS 3 for contingent assets that would not be affected by replacing the reference to the Framework for the Preparation and Presentation of Financial Statements.

These amendments had no impact on the financial statements of the bank as there were no contingent assets, liabilities or contingent liabilities within the scope of these amendments that arose during the period.

Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16

In May 2020, the IASB issued Property, Plant and Equipment — Proceeds before Intended Use, which prohibits entities from deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.

These amendments had no impact on the financial statements of the bank as there were no sales of such items produced by property, plant and equipment made available for use on or after the beginning of the earliest period presented.

Standards and amendments issued but not yet effective

Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16

The amendments are not expected to have a material impact on the bank

Onerous Contracts – Costs of Fulfilling a Contract – Amendments to IAS 37

In May 2020, the IASB issued amendments to IAS 37 to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

The amendments apply a "directly related cost approach". The costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to contract activities.

General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

The bank will apply these amendments to contracts for which it has not yet fulfilled all its obligations and determined that amendment had no material impact on the bank.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

New and amended standards and interpretations

AIP IFRS 1 First-time Adoption of International Financial Reporting Standards – Subsidiary as a first-time adopter

As part of its 2018-2020 annual improvements to IFRS standards process, the IASB issued an amendment to IFRS 1 First-time Adoption of International Financial Reporting Standards. The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent's date of transition to IFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1.

The amendment had no impact on the financial statements of the bank

IFRS 9 Financial Instruments – Fees in the '10 per cent' test for derecognition of financial liabilities

As part of its 2018-2020 annual improvements to IFRS standards process the IASB issued amendment to IFRS 9. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received by the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

These amendments had no impact on the financial statements of the bank as there were no modifications of the bank's financial instruments during the period.

Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the IASB issued amendments to IAS 8, in which it introduces a definition of 'accounting estimates. The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. Earlier application is permitted as long as this fact is disclosed.

The amended standard clarifies that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors. The previous definition of a change in accounting estimate specified that changes in accounting estimates may result from new information or new developments. Therefore, such changes are not corrections of errors. This aspect of the definition was retained by the Board.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

Effective for annual periods beginning on or after 1 January 2023

IFRS Practice Statement 2 Making Materiality Judgements (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

The amendments aim to help entities provide accounting policy disclosures that are more useful by:

- Replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies
- Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

Replacement of the term 'significant' with 'material' In the absence of a definition of the term 'significant' in IFRS, the Board decided to replace it with 'material' in the context of disclosing accounting policy information. 'Material' is a defined term in IFRS and is widely understood by the users of financial statements, according to the Board.

In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and the nature of them.

Transition

Earlier application of the amendments to IAS 1 is permitted as long as this fact is disclosed.

Impact

The bank is reviewing relevant accounting policy information disclosures to ensure consistency with the amended standard.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

2.5. Summary Of Significant Accounting Policies

(a) Recognition of interest income

(i) The effective interest rate

Under IFRS 9, interest income is recorded using the EIR method for all financial assets measured at amortised cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset or liability or, when appropriate, a shorter period, to the gross carrying amount of the financial asset.

The EIR (and therefore, the amortised cost of the financial asset) is calculated by taking into account transaction costs and any discount or premium on the acquisition of the financial asset, as well as fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, the EIR calculation also takes into account the effect of potentially different interest rates that may be charged at various stages of the financial asset's expected life, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

If expectations of fixed rate financial assets' or liabilities' cash flows are revised for reasons other than credit risk, then changes to future contractual cash flows are discounted at the original EIR with a consequential adjustment to the carrying amount. The difference from the previous carrying amount is booked as a positive or negative adjustment to the carrying amount of the financial asset or liability on the balance sheet with a corresponding increase or decrease in Interest revenue calculated using the effective interest method.

For floating-rate financial instruments, periodic re-estimation of cash flows to reflect the movements in the market rates of interest also alters the effective interest rate, but when instruments were initially recognised at an amount equal to the principal, re-estimating the future interest payments does not significantly affect the carrying amount of the asset or the liability.

The IBOR reform Phase 2 amendments allow as a practical expedient for changes to the basis for determining contractual cash flows to be treated as changes to a floating rate of interest, provided certain conditions are met. The conditions include that the change is necessary as a direct consequence of IBOR reform and that the transition takes place on an economically equivalent basis.

(ii) Interest and similar income/expense

Net interest income comprises interest income and interest expense calculated using both the effective interest method and other methods. These are disclosed separately on the face of the income statement for both interest income and interest expense to provide symmetrical and comparable information.

In its Interest income/expense calculated using the effective interest method, the Bank only includes interest on those financial instruments set out on note 5.

The Bank calculates interest income on financial assets, other than those considered credit-impaired, by applying the EIR to the gross carrying amount of the financial asset.

When a financial asset becomes credit-impaired is therefore regarded as 'Stage 3', the Bank calculates interest income by applying the EIR to the net amortised cost of the financial asset. If the financial asset cures and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

For purchased or originated credit-impaired (POCI) financial assets the Bank calculates interest income by calculating the credit-adjusted EIR and applying that rate to the amortised cost of the financial asset. The credit adjusted EIR is the interest rate that, at initial recognition, discounts the estimated future cash flows (including credit losses) to the amortised cost of the POCI financial asset.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(b) Fees and commission income

The Bank earns fees and commission income from a diverse range of services it provides to its customers. Fee income can be divided into the following two categories:

- Fees income earned from services that are provided over a certain period of time

Fees earned for the provision of services over a period of time are accrued over that period.

Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognised as an adjustment to the EIR on the loan. When it is unlikely that a loan will be drawn down, the loan commitment fees are recognised over the commitment period on a straight line basis.

- Fees income from providing transaction services

Fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses, are recognised on completion of the underlying transaction. Fees or components of fees that are linked to a certain performance are recognised after fulfilling the corresponding criteria.

The bank disaggregates the commission into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.

When selecting the type of category (or categories) to use to disaggregate revenue, an entity must consider how information about the entity's revenue has been presented for other purposes, including all of the following:

- a. Disclosures presented outside the financial statements (for example, in earnings releases, annual reports or investor presentations)
- b. Information regularly reviewed by the chief operating decision maker for evaluating the financial performance of operating segments
- c. Other information that is similar to the types of information identified in I(a) and (b) and that is used by the entity or users of the entity's financial statements to evaluate the entity's financial performance or make resource allocation decisions.

Examples of categories that might be appropriate include, but are not limited to, all of the following:

- Geographical region (for example, country or region)
- Market or type of customer (for example, government and non-government customers)
- Type of contract (for example, fixed-price and time-and-materials contracts)
- Contract duration (for example, short-term and long-term contracts)
- Timing of transfer of goods or services (for example, revenue from goods or services transferred to customers at a point in time and revenue from goods or services transferred over time).

Fees and commission expenses

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate.

Other fee and commission expenses relate mainly to transaction and service fees, which are expensed as the services are received.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(c) Foreign currency translation

The financial statements are presented in Rwandan Franc (Frw) which is also the functional currency of the entity.

Transactions in foreign currencies are initially recorded at the rates of exchange ruling at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the rates of exchange at the reporting date. All translation gains and losses arising on non-trading activities are taken to 'other operating income/expenses' in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial recognition.

Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

(d) Transactions and balances

Transactions during the year that are denominated in foreign currencies are converted into the Functional Currency at the rates of exchange prevailing at the dates of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation, at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

(e) Financial Instruments- Initial recognition

Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the trade date, i.e., the date on which the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades, i.e., purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Bank recognises balances due to customers when funds are transferred to the Bank:

(f) Financial Instruments- Initial recognition

The Bank measures Due from banks, Loans and advances to customers and other financial investments at amortised cost only if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding

As a second step of its classification process the Bank assesses the contractual terms of the financial asset to identify whether they meet the SPPI test

The SPPI test

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

Initial measurement of financial instruments

The Bank classifies and presents its financial instruments in the financial statements as defined in IFRS 9 on the basis of:

- The business model adopted (portfolio perspective)
- Contractual cash flow characteristics ("CCC" Criterion)

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The bank reclassifies debt investments when and only when its business model for managing those assets changes.

Financial assets

The bank determines the appropriate classification of its financial assets at initial recognition. The Bank recognises a financial asset in its statement of financial position when it becomes party to the contractual provisions of the instrument.

The bank calculates interest using the effective interest rate ("EIR") method and recognise this in the profit or loss. In instances, where the bank is unable to use the "EIR", it will sufficiently demonstrate the use of an alternative method such as the "discount rate"

Financial liabilities

The bank's holding in financial liabilities represents mainly deposits from banks and customers and other liabilities. Such financial liabilities are initially recognised at fair value and subsequently measured at amortised cost.

Subsequent to initial recognition, the Bank's financial assets are measured at amortised cost ("AC")

The Bank classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at Amortised cost and FVPL.

The Bank classifies and measures its derivative and trading portfolio at FVPL. The Bank may designate financial instruments at FVPL, if so doing eliminates or significantly reduces measurement or recognition inconsistencies.

At initial recognition, the bank measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

The bank's holding in financial liabilities represents mainly deposits from banks and customers and other liabilities. Such financial liabilities are initially recognised at fair value and subsequently measured at amortised cost. Financial liabilities are derecognised when they have been redeemed or otherwise extinguished.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(f) Financial Instruments- Derecognition

(i) Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired; or
- The Bank has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either:
 - the Bank has transferred substantially all the risks and rewards of the asset, or
 - The Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Bank has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Bank's continuing involvement in the asset. In that case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Bank could be required to repay.

Modifications leading to derecognition

Where the renegotiation or modification of the contractual cash flows of a financial asset lead to the derecognition of the existing financial asset in accordance with IFRS 9 the modified asset is considered a 'new' financial asset for the purposes of IFRS 9.

Accordingly, the date of the modification should be treated as the date of initial recognition of that financial asset when applying the impairment requirements to the modified financial asset. This typically means measuring the loss allowance at an amount equal to 12-month expected credit losses until the criteria for the recognition of lifetime expected credit losses is met. However, in some unusual circumstances following a modification that results in derecognition of the original financial asset, there may be evidence that the modified financial asset is credit-impaired at initial recognition, and thus, the financial asset should be recognised as an originated credit-impaired financial asset. This might occur, for example, in a situation in which there was a substantial modification of a distressed asset that resulted.

Modifications that do not result in modification

When the contractual cash flows of a financial instrument are modified and does not result in derecognition, differences between the recalculated gross carrying amount and the carrying amount before modification is recognised in profit or loss as modification gain or loss, at the date of modification.

Write off and recoveries

Loans and debt securities are written off when the bank has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event.

The bank may apply enforcement activities to financial assets written off. Recoveries resulting from the bank's enforcement activities will result in impairment gains, which will be presented in 'net impairment loss on financial assets' in the statement of profit or loss. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(ii) Financial Liabilities

- A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.
- Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in profit or loss

The bank's holding in financial liabilities represents mainly deposits from banks and customers and other liabilities. Such financial liabilities are initially recognised at fair value and subsequently measured at amortised cost.

Disclosures

The disclosure requirements of IFRS 7- Financial Instruments: Disclosures, after consequential amendments arising from IFRS 9, are applicable.

For purposes of reporting, the bank will disclose impairment movements based on On- Balance Sheet Assets and Off – Balance Sheet Assets

Impairment of financial assets

The Bank recognises loss allowances for Expected Credit Losses ("ECL") on the following financial instruments:

- Financial assets that are debt instruments;
- Customer loans and advances
- Other Loans and receivables
- Financial guarantee contracts issued
- Loan commitments issued; and
- Loans to other banks

The Bank's impairment approach is based on expected credit losses and the bank uses the general approach in determining the impairment of financial assets. Therefore, it is not necessary for a loss event to have occurred before credit losses are recognised; instead, a loss allowance is always recognized for expected credit losses and is re-measured at each reporting date for changes in those expected credit losses. The only exception is for purchased or credit-impaired ("**POCI**") financial assets where a different impairment approach applies. Determining whether an expected credit loss should be based on 12-month expected credit losses or lifetime expected credit losses depends on whether there has been a significant increase in credit risk ("**SICR**") of the financial asset since initial recognition.

Impairment of financial assets

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer
- a breach of contract such as a default or past-due event
- the restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

Purchased or originated credit-impaired (POCI) financial assets

POCI financial assets are treated differently because the asset is credit-impaired at initial recognition. For these assets, the bank recognises all changes in lifetime ECL since initial recognition as a loss allowance with any changes recognised in profit or loss. A favorable change for such assets creates an impairment gain.

The Bank recognises loss allowances for Expected Credit Losses ("ECL") on the following financial instruments:

The bank measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- Debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments on which credit risk has not increased significantly since their initial recognition

Loss allowances other receivables are always measured at an amount equal to lifetime ECL.

The Bank considers a debt security to have low credit risk when their credit risk rating is equivalent to the globally understood definition of 'investment grade'. In the case of the bank, debt instruments of AAA, AA, A and BBB grade qualify as low credit risk.

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

The Bank assesses on a forward-looking basis (gross domestic product, interest rates, inflation, CPIs) are expected to deteriorate over the next year which can lead to an increased number of defaults, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. the expected credit loss ('ECL') associated with its debt instrument assets carried at amortised cost with the exposure arising from loan commitments and financial guarantee contracts. The bank recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes. The bank considers three scenarios/outcomes as worst case, base case and best case. Each of these is associated with different PDs, EADs and LGDs.
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set-off the recognised amounts and there is an intention to settle the asset and the liability on a net basis, or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(g) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. For the purpose of the statement of cash flows, cash and cash equivalents comprise cash on hand, unrestricted balance in current accounts with National Bank of Rwanda, and amounts due from banks and government securities on demand or with an original maturity of three months or less, net of amounts due to banks and other financial institutions.

(h) Property and equipment

Property and equipment are initially recorded at cost, and subsequently stated at historical cost less accumulated depreciation and accumulated impairment. Historical cost includes expenditure that is directly attributable to the acquisition of these assets.

Costs incurred in the process of acquiring or constructing an item of property and equipment are recognised as capital work in progress. Once acquisition or construction is complete and the item is ready for use, the carrying amount is transferred to the relevant property and equipment category. Depreciation commences when the item of property or equipment is put into use.

Depreciation is calculated on a straight-line basis at annual rates estimated to write off the cost of each asset to its residual value over its expected useful life as follows:

Buildings and improvements on leasehold land	lesser of 40 years and the unexpired period of lease
Equipment, furniture and fittings	3 to 8 years
Motor vehicles	4 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

Property and equipment are reviewed for impairment on an annual basis when there is an indication of impairment. Where the carrying amount of an asset is greater than its estimated recoverable amount, it is immediately written down to its recoverable amount. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

Gains or losses on disposal of property and equipment are determined by comparing proceeds with carrying amount and are taken into account in determining operating profit.

(i) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Intangible assets comprise acquired computer software license costs, which are recognised on the basis of expenditure incurred to acquire and bring the specific software to use.

Costs that are directly associated with the production of identifiable and unique software products controlled by the bank, and that will probably generate economic benefits exceeding costs beyond one year, are recognised as intangible assets.

Software amortization rate -3 to 10 years

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

Intangible assets are tested for impairment whenever there is any objective evidence or indication that these assets may be impaired for the purpose of impairment testing, the recoverable amount is determined on an individual asset basis

An intangible asset is derecognized upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss.

(j) Provisions and contingent liabilities

Provisions for legal claims are recognised when the bank has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation.

Contingent liabilities are possible obligations arising from past events, whose existence will be confirmed only by uncertain future events, or present obligations arising from past events that are not recognised because either an outflow of economic benefits is not probable or the amount of the obligation cannot be reliably measured. Contingent liabilities are not recognised but information about them is disclosed unless the possibility of any outflow of economic benefits in settlement is remote.

(k) Employee benefits

(i) Short-term employee benefits

Short term employee benefits are those expected to be settled wholly before twelve months after the end of annual reporting period during which employee services are rendered, but do not include termination benefits like wages and salaries.

(ii) Retirement benefit obligations

The Bank and all its employees also contribute to the Rwanda Social Security Board, which is a defined contribution scheme. The Bank's contributions to the defined contribution schemes are charged to profit or loss in the year to which they relate.

(l) Income tax expense

Income tax expense for the period comprises current and deferred income tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity respectively. Refer to note 12 & 26 for disclosure of carrying amounts.

i) Current income tax

The current income tax charge is calculated on the basis of tax laws enacted or substantively enacted at the reporting date. The directors periodically evaluate positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. They establish provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

ii) Deferred income tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current income tax assets against current income tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same entity or different taxable entities where there is an intention to settle the balances on a net basis.

(m) Sale and repurchase agreements

Securities sold subject to repurchase agreements ('repos') are classified in the financial statements as pledged assets when the transferee has the right by contract or custom to sell or repledge the collateral; the counterparty liability is included in amounts due to other banks, other deposits or deposits due to customers, as appropriate. Securities purchased under agreements to resell ('reverse repos') are recorded as loans and advances to other banks or customers, as appropriate. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method. Securities lent to counterparties are also retained in the financial statements.

(n) Share capital

Ordinary shares are classified as 'share capital' in equity.

(o) Letters of credit, acceptances and guarantees

Letters of credit, acceptances and guarantees are accounted for as off-balance sheet transactions and disclosed as contingent liabilities.

To determine the ECL for off balance sheet assets, a credit conversion factor is applied to the undrawn amount to obtain the exposure. The Basel Committee's credit conversion factor was adopted for the off-balance sheet of the banks.

(p) Leases

As per IFRS 16, on the commencement date of each lease (excluding leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value) the bank recognises a right-of-use asset and a lease liability.

The lease liability is measured at the present value of the lease payments that are not paid on that date. The lease payments include fixed payments, variable payments that depend on an index or a rate, amounts expected to be payable under residual value guarantees, and the exercise price of a purchase option if the bank is reasonably certain to exercise that option. The lease payments are discounted at the interest rate implicit in the lease. If that rate cannot be readily determined, the bank's incremental borrowing rate is used.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

For leases that contain non-lease components, the company allocates the consideration payable to the lease and non-lease components based on their relative stand-alone components.

The right-of-use asset is initially measured at cost comprising the initial measurement of the lease liability, any lease payments made on or before the commencement date, any initial direct costs incurred, and an estimate of the costs of restoring the underlying asset to the condition required under the terms of the lease.

Subsequently the lease liability is measured by increasing the carrying amount to reflect interest on lease liability; reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any remeasurement or lease modifications, or revised fixed lease payments.

All right-of-use assets are subsequently measured at cost less accumulated depreciation and any accumulated impairment losses, adjusted for any remeasurement of the lease liabilities. Depreciation is calculated using the straight-line method to write-down the cost of each asset to its residual value over its estimated useful life. If the ownership of the underlying asset is expected to pass to the bank at the end of the lease term, the estimated useful life would not exceed the lease term. For leases with a term, on commencement, of 12 months or less and leases for which the underlying asset is of low value, the total lease payments are recognized in profit or loss on a straight-line basis over the lease period.

2.6 Financial risk management objectives and policies

Risk management framework

The bank's activities expose it to a variety of financial risks, including credit risk and the risks of changes in debt and equity market prices, foreign currency exchange rates, liquidity risk and interest rates. The bank's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on its financial performance. Risk management is carried out under policies approved by the board of directors. The board provides written principles for overall risk management as well as written policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and the investment of surplus funds.

By their nature, the bank's activities are principally related to the use of financial instruments, including derivatives. The bank accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn above-average interest margins by investing these funds in high-quality assets. The bank seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The bank seeks to raise its interest margins by obtaining above-average margins, net of allowances, through lending to commercial and retail borrowers with a range of credit standing. Such exposures involve not just on-balance sheet loans and advances; the Bank also enters into guarantees and other commitments such as letters of credit and performance, and other bonds. The Bank also trades in financial instruments where it takes positions in traded and over-the-counter instruments to take advantage of short-term market movements in bond prices and currency and interest rates. The board places trading limits on the level of exposure that can be taken in relation to both overnight and intra-day market positions.

Foreign exchange and interest rate exposures associated with derivatives are normally offset by entering into counterbalancing positions, thereby controlling the variability in the net cash amounts required to liquidate market positions.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(a) Credit risk

The bank takes on exposure to credit risk, which is the risk that a counterparty may be unable to pay amounts in full, when due. The bank structures the level of credit risk it undertakes by placing limits on the amount of risk accepted in respect of any borrower, or groups of borrowers, and to industry segments. Such risks are monitored on a continuous basis and subject to annual or more frequent review. Limits on the level of credit risk by product, industry sector and by country are approved by the board of directors.

The exposure to any one borrower including banks is further restricted by sub-limits covering on and off balance sheet exposures and daily delivery risk limits in relation to trading items such as foreign exchange forward contracts. Actual exposures against set limits are monitored on a daily basis.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral and corporate and personal guarantees.

Impairment provisions are made for losses that have been incurred at the reporting date. Significant changes in the economy, or in the health of a particular industry segment that represents a concentration of the bank's portfolio, could result in losses that are different from those provided for at the reporting date. Directors therefore carefully manage the exposure to credit risk.

Customer Loans and advances

The bank aligns the classification criteria for assets that are past due or impaired in line with regulatory guidelines. In the determination of the classification of accounts, performance is the primary consideration. The classification of an account reflects a judgment about risks of default and loss associated with the credit facility. The classification process establishes a consistent approach to problem recognition, problem labeling, remedial action and the initiation of credit write-offs.

Expected credit loss measurement

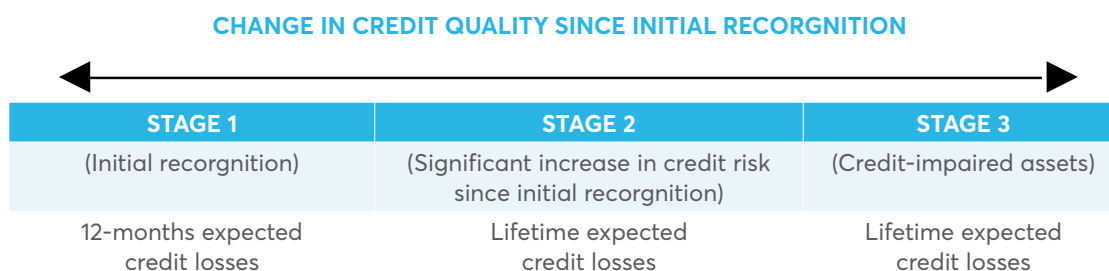

IFRS 9 outlines a 'three-Stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

- A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1' and has its credit risk continuously monitored by the bank.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit-impaired.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'.
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months. Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis.
- A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward looking information.
- Purchased or originated credit-impaired financial assets are those financial assets that are credit impaired on initial recognition. Their ECL is always measured on a lifetime basis (Stage 3).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

The following diagram summarises the impairment requirements under IFRS 9 (other than purchased or originated credit-impaired financial assets):

"ECL" is defined as the amount on a probability-weighted basis as the difference between the cash flows that are due to the bank in accordance with the contractual terms of a financial instrument and the cash flows that the bank expects to receive.

ECL is formula driven, i.e. $ECL = PD \times LGD \times EAD \times EIR$

- * PD is defined as probability of default
- * LGD is defined as Loss given default
- * EAD is defined as Exposure at default
- * EIR is defined as Effective interest rates applicable

The Calculation of ECL

The Bank calculates ECL based on a three probability-weighted scenarios to measure the expected cash

shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

(i) Credit related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the bank will make

payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as customer loans and advances.

Documentary and commercial letters of credit, which are written undertakings by the bank on behalf of a customer authorising a third party to draw drafts on the bank up to a stipulated amount under specific

terms and conditions, are collateralised by the underlying shipments of goods to which they relate and therefore carry less risk than customer loans and advances.

Commitments to extend credit represent un-utilised portions of authorised credit in the form of customer loans and advances, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss to the extent of the total un-utilised commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

customers maintaining specific credit standards. The Bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of risk than shorter-term commitments.

The amount that best represents the bank's maximum exposure to credit risk is the carrying value of its financial position. Loans and advances to customers are secured by collateral in the form of charges over land and buildings and/or plant and machinery or corporate guarantees and other collaterals accepted by the laws of the land. However, there are loans and advances to major corporations and individuals that are unsecured. In these cases, the bank undertakes stringent credit risk assessments before any disbursements are made.

The directors are confident in its ability to continue to control exposure of credit risk to the bank resulting from both its loan and advances portfolio and debt securities based on the following:

- The Company exercise stringent controls over the granting of new loans and receivables.
- 89% (2021: 100%) of the loans and advances portfolio are neither past due nor impaired.
- 100% (2021:100%) of the debt securities are government securities.

Government debt securities are financial instruments issued by sovereign government and include both long term bonds and short-term bills with fixed or floating rate interest payments, these securities are highly liquid and traded in active markets.

Customer Loans and advances

The bank aligns the classification criteria for assets that are past due or impaired in line with regulatory guidelines. In the determination of the classification of accounts, performance is the primary consideration. The classification of an account reflects a judgment about risks of default and loss associated with the credit facility. The classification process establishes a consistent approach to problem recognition, problem labeling, remedial action and the initiation of credit write-offs.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- **PD** The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio.
- **EAD** The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
- **LGD** The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral or credit enhancements that are integral to the loan and not required to be recognised separately. It is usually expressed as a percentage of the EAD.

When estimating the ECL, the Bank considers three scenarios being a base case, a best case, and a worst case. Each of these is associated with different PDs, EADs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

The bank defines default when the borrower is unlikely to pay credit obligations in full, without recourse such as realizing security, the borrower is 90 days past due on any material credit obligation to the bank,

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

or when it has become probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to repay credit obligations.

Loans and debt securities are written off partially or in full when there is no reasonable expectation of recovering a financial asset in its entirety or portion thereof. This assessment is carried out on individual basis. Recoveries of amounts previously written off are recognised when cash is received and are included in the "impairment losses on financial instruments."

Significant Increase in credit risk (SICR)

The bank decision on whether expected credit losses are based on 12-month expected credit losses or lifetime expected credit losses depends on whether there has been a significant increase in credit risk since initial recognition. An assessment of whether credit risk has increased significantly is made at each reporting date. When making the assessment, the bank uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. Where it was determined that COVID-19 would have a material impact on the clients' business the client was deemed to have an increase in credit risk and was moved to a higher credit risk stage. The current performance and operations of the business under COVID-19 conditions and its current ability to make payments was also considered in determining whether there has been an increase in credit risk. This forms the basis of stage 1, 2 and 3 classification and subsequent migration. Company applies qualitative and quantitative criteria for stage classification and for its forward and backward migration.

Quantitative Criteria

The quantitative criteria is based on relative and not absolute changes in credit quality as stated in the table above driven by ratings and days past due.

The bank considers that financial instruments for which default patterns are not concentrated at a specific point during the expected life of the financial instrument, changes in the risk of a default occurring over the next 12 months may be a reasonable approximation of the changes in the lifetime risk of a default occurring and could be used to determine whether credit risk has increased significantly since initial recognition.

The appropriateness of using changes in the risk of a default occurring over the next 12 months to determine whether lifetime expected credit losses should be recognized depends on the specific facts and circumstances. Risk of default occurring over the next 12 months is not suitable basis for determining whether credit risk has increased on a financial instrument with a maturity of more than 12 months when:

1. the financial instruments only have significant payment obligations beyond the next 12 months;
2. changes in relevant macroeconomic or other credit-related factors occur that are not adequately reflected in the risk of a default occurring in the next 12 months; or
3. changes in credit-related factors only have an impact on the credit risk of the financial instrument (or have a more pronounced effect) beyond 12 months

The bank's quantitative credit grading, as compared to BNR's prudential guidelines, into five prudential guidelines categories as follows:

IFRS 9 credit staging	BNR Classification	Days past due
1	Normal	Up to date and in line with contractual agreements or within 30 days' arrears
2	Watch	31 to 90 days overdue
3	Substandard	91 to 180 days overdue
	Doubtful	181 – 365 days overdue
	Loss	Over 365 overdue

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

Qualitative Criteria

In addition to the above, the bank considers other qualitative factors in determining the classification above and may accelerate the classification of credit facilities where deemed appropriate. They include but not limited to the following:

1. Significant changes in the terms of the same instrument if it were issued at the reporting date that indicate a change in credit risk since initial recognition, e.g.: increase in credit spread; more stringent covenants; increased amounts of collateral or guarantees; or higher income coverage.
2. Significant changes in external market indicators of credit risk for the same financial instrument (or similar instrument of the borrower), e.g.; credit spread; credit default swap prices; length of time or the extent to which the fair value of a financial asset has been less than its amortized cost; other market information related to the borrower, such as changes in the price of a borrower's debt and equity instruments; or external credit rating (actual or expected).
3. Changes in the bank's credit management approach in relation to the financial instrument (e.g. based on emerging indicators of changes in the credit risk of the financial instrument, the bank's credit risk management practice is expected to become more active or focused on managing the instrument, including the instrument becoming more closely monitored or controlled, or the bank specifically intervening with the borrower).
4. Actual or expected adverse changes in business, financial or economic conditions significantly affecting borrower's ability to meet its debt obligations (e.g. increase in interest rates or unemployment rates); operating results of the borrower e.g. declining revenues or margins, increasing operating risks, working capital deficiencies, decreasing asset quality, increased balance sheet leverage, liquidity, management problems or changes in the scope of business or organizational structure (such as the discontinuance of a segment of the business) that results in a significant change in the borrower's ability to meet its debt obligations; or regulatory, economic, or technological environment of the borrower that results in a significant change in the borrower's ability to meet its debt obligations (e.g. a decline in the demand for the borrower's sales product because of a shift in technology).
5. Significant changes in the value of collateral or in the quality of third-party guarantees or credit enhancements, which are expected to reduce the borrower's economic incentive to pay or otherwise effect the probability of default (e.g. if the value of collateral declines because house prices decline, borrowers in some jurisdictions have a greater incentive to default on their mortgages); or quality of a guarantee provided by a shareholder (or an individual's parents) if the shareholder (or parents) have an incentive and financial ability to prevent default by capital or cash infusion.
6. Expected changes in the loan documentation (e.g. breach of contract leading to covenant waivers or amendments, interest payment holidays, interest rate step-ups, requiring additional collateral or guarantees).
7. Customer Loans and advances
Significant changes in the expected performance and behavior of the borrower, including changes in the payment status of borrowers in the group (e.g. increase in delayed contractual payments or number of credit card borrowers expected to approach or exceed their credit limit or who are expected to be paying the minimum monthly amount) Customer Loans and advances less than 30 days past due date are not considered impaired, unless other information is available to indicate the contrary. The breakdown of loans and advances is summarised below:

Portfolio management is an integral part of the credit risk management process that enables the Bank and Company to limit concentrations, reduce volatility, increase liquidity and achieve optimum earnings. The responsibility for portfolio management lies primarily with business units, with oversight and review by credit risk management while the Board Credit Committee is responsible for credit approvals. The Bank's portfolio management plan entails:

The setting up of portfolio targets and concentrations.

- Establishing target market risk acceptance criteria and key success factors. These are subject to regular review to ensure their continued appropriateness.
- Monitoring the portfolio risk profile, risk-adjusted returns, risk concentrations, economic market and competitive data.
- Identifying and analyzing trends and concentrations that could affect the risk and performance of the portfolio.
- Stress testing of the portfolio for the purpose of measuring potential losses.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

Other financial assets

The other financial assets mainly relate to government securities and balances held with Central Banks and other financial institutions that are highly rated and therefore considered low risk. None of these were past due or impaired. No ECL impairment has been recognised on other financial assets.

(i) Gross maximum exposure

The following table breaks down gross maximum credit exposure at carrying amounts (without taking into account any collateral held or other credit support).

Gross maximum exposure

	2022	2021
	Frw 000	Frw 000
Balances with central bank of Rwanda	9,916,217	6,387,360
Due from banking institutions	13,336,111	6,348,295
Government securities	26,740,647	23,907,905
Customer loans and advances (Gross)	89,511,207	53,550,903
Other financial assets	5,405,485	3,870,455
Total on balance sheet	144,909,667	94,064,918

Credit risk exposures relating to off-balance sheet items are as follows:

Guarantees	7,377,687	4,081,134
Financing commitments given	4,242,017	1,282,005
Letters of Credit	3,470,313	-
Total off-balance sheet	15,090,017	5,363,139
Total credit risk exposure	159,999,684	99,428,057

(ii) Concentrations of risk

To avoid excessive concentration in any one of several industrial sectors and, by extension, the overall safety of the Company, the lending portfolio is monitored and managed at all times. Equally, care is taken to avoid over-exposure to any one borrower. There are restrictions to the maximum exposure permitted with respect to any one name based on capital and these restrictions which are strictly adhered to, are laid down by regulation. Any changes made to the portfolio management plan are subject to the approval of the Board of Directors. The economic sector risk concentrations within the customer loans and advances portfolios at the end of the year were as follows:

	2022	2021
	%	%
Manufacturing	24.8	23.0
Private individuals	14.7	24.0
Government bodies and parastatals	20.5	14.6
Transport and communications	7.7	11.0
Wholesale, retail trade and hotels	24.0	25.0
Building, construction and real estate	6.8	2.4
Others	1.5	-
	100	100

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(iii) Collateral management

The Bank uses a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is common practice. The acceptability of collateral for credit risk mitigation is guided by the Bank's procedures and policies. The main types of collateral taken are:

Type of lending	Common collateral type
Mortgage lending	First ranking legal charge over the property financed.
Commercial loans	Debentures over the Company's assets, cash cover in cash margin account, first ranking legal charge over both commercial and residential properties, directors' personal guarantees and Company guarantees.
Personal loans	First ranking legal charge over property, Checkoffs and cash backed
Asset finance	Secured by motor vehicles and chattel registrations
Other loans and advances	Debentures over the Company's assets, cash cover in cash margin account, first ranking legal charge over both commercial and residential properties, directors' personal guarantees and Company guarantees.

Valuation of collateral

The bank has a panel of valuers who undertake valuation of property and other assets to be used as collateral. The valuers in the panel are qualified professional valuers with adequate experience in the field of property and machinery valuation. Collateral is valued in accordance with the bank's risk mitigation policy, which prescribes the frequency of valuation for different collateral types. Collaterals are monitored regularly, and valuation of collateral are performed between 3 to 5 years intervals. New collaterals presented are valued by the professional valuers before are signed up.

Financial effect of collateral

As at 31 December 2022, 89% (2021: 92%) of the impaired loans (net of suspended interest) were covered by collateral.

b) Market risk

i) Currency risk

The bank takes deposits and lends in currencies other than the local currency and are therefore exposed to effects of fluctuations in the prevailing foreign currency exchange rates on their financial position and cash flows. The board sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are both monitored daily. The currency position and exposure is managed within the exposure guidelines relating to core capital stipulated by regulation. The bank's significant currency positions were:

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

ii) Interest rate risk

IBOR reform

Following the decision by global regulators to phase out IBORs and replace them with the reference rates, the bank manages the transition for any of its contracts that could be affected. IBOR reform exposes the Bank to various risks, which the project is managing and monitoring closely. These risks include but are not limited to the following:

- Conduct risk arising from discussions with clients and market counterparties due to the amendments required to existing contracts necessary to effect IBOR reform
- Financial risk to the Bank and its clients that markets are disrupted due to IBOR reform giving rise to financial losses
- Pricing risk from the potential lack of market information if liquidity in IBORs reduces and RFRs are illiquid and unobservable
- Operational risk arising from changes to the Bank's IT systems and processes, also the risk of payments being disrupted if an IBOR ceases to be available

Interest rate is the risk that the future cash flows of financial instruments will fluctuate because of changes in the market interest rates. Interest margin may decrease as a result of such changes but may increase losses in the event that unexpected movement arises.

The bank closely monitors interest rate movements and seeks to limit its exposure by managing the interest rate and maturity structure of assets and liabilities carried on the statement of financial position. Assets and Liabilities Committee monitors compliance with the set interest rate gaps. The bank has a robust Assets and Liabilities Committee which reviews daily cash management, monitors daily liquidity limits of loan to deposit ratio and interbank borrowing. The bank also performs stress testing of liquid assets to ensure severe liquidity gaps are adequately managed.

Customer deposits	6.1	2.4
Balance due to banks	5.6	-

d) Liquidity risk

The bank is exposed to daily calls on its available cash resources arising from overnight deposits, current accounts, maturing deposits, and calls on cash settled contingencies. The bank does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. The board sets limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of inter-bank and other borrowing facilities that should be in place to cover withdrawals at unexpected levels of demand.

The maturity of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Company. The Assets and Liabilities Committee reviews the maturity profile of liabilities on a weekly basis and ensures that sufficient liquidity is maintained to meet maturing deposit obligations. The bank also fully complies with regulatory minimum cash and liquidity ratio requirements. The following tables analyses assets and liabilities of the bank into relevant maturity groupings based on the remaining period to contractual maturity date as at the reporting date.

The matching and controlled mismatching of the maturities of assets and liabilities and interest rates thereon is fundamental to the management of the Company. It is unusual for banks to ever be completely matched since business transacted is often of uncertain terms and of different types. An unmatched

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

e) Market risk sensitivity analysis

Market risk is the risk that changes in market prices, which include currency exchange rates and interest rates, will affect the value or future cash flows of a financial instrument. Market risk arises from open positions in interest rates and foreign currencies, both of which are exposed to general and specific market movements and changes in the level of volatility. The objective of market risk management is to manage and control risk exposures within acceptable limits, while optimising return. Overall responsibility for the management of market risk rests with the Assets and Liabilities Committee. The Bank's Treasury and Risk divisions are responsible for the development of detailed risk management policies.

The bank is exposed to risks associated with the effects of fluctuations in prevailing levels of market interest. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. At 31 December 2022, the effect of a 100 basis points change in net interest margin would have resulted in an increase or decrease of Frw 115 million (2021 – Frw 102 million) on the profit after income tax expense

The Bank operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar, the Sterling pound, the Euro, the Kenya shilling, the Uganda shilling and the Tanzania shilling. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investment in foreign operations. Foreign exchange risk arising from future commercial transactions and recognised assets and liabilities are managed through use of forward contracts. Currency exposure arising from the net assets of foreign operations is managed primarily through borrowings denominated in the relevant foreign currencies.

At 31 December 2022, had the Rwanda franc weakened or strengthened against the US dollar by 5% with all other variables held constant the profit after income tax expense would have been Frw 8.1 million (2021- Frw 5.1 million) higher or lower mainly as a result of dollar denominated customer loans and advances and placements with other banks.

The bank did not have significant transactions in the other currencies in the year 2022

The bank's objectives when managing capital, are to comply with the capital requirements set by the regulators and safeguard the bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders as well as maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored regularly by the directors, employing techniques based on guidelines developed by the Basel Committee, as implemented by the regulatory authorities for supervisory purposes. Returns on capital adequacy are filed with the regulators on a regular basis.

The level of capital is reviewed on an annual basis and is determined principally by the level of business growth realised during the period.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

In Rwanda, the regulator requires each banking institution to:

- a) hold a minimum level of regulatory capital of Frw 20 billion by the year 2022;
- b) maintain a ratio of core capital to the risk-weighted assets at a minimum of 12.5%; maintain a ratio of total capital to risk-weighted assets at a minimum of 15%.
- c) During the year under review, NCBA Bank Rwanda Plc maintained capital adequacy ratios at levels above the stipulated minimum regulatory benchmarks. In line with Basel and local regulatory guidelines, total capital is divided into two tiers as follows:
 - Tier 1 capital (core capital): comprises share capital.
 - Tier 2 capital (supplementary capital): comprises 25% (subject to regulatory approval) of, statutory credit risk reserve. Qualifying tier II capital is limited to 100% of tier I capital.
 - statutory credit risk reserve qualifying as tier II capital cannot exceed 1.25% of risk weighted assets total value.
- d) During the year under review, NCBA Bank Rwanda Plc maintained capital adequacy ratios at levels above the stipulated minimum regulatory benchmarks. In line with Basel and local regulatory guidelines, total capital is divided into two tiers as follows:
 - Tier 1 capital (core capital): comprises share capital and retained earnings.
 - Tier 2 capital (supplementary capital): comprises 25% statutory credit risk reserve; Qualifying tier II capital is limited to 100% of tier I capital.
 - Statutory credit risk reserve qualifying as tier II capital cannot exceed 1.25% of risk weighted assets total value.

Risk weighted assets are measured by means of a hierarchy of four risk weights classified according to the nature of (and reflecting an estimate of the credit risk associated with) each asset and counterparty. A similar treatment is adopted for off-balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

The table below summarises the composition of regulatory capital and capital adequacy ratios of NCBA bank as at 31 December 2022.

(e) Basel ratios

	2022	2021
	Frw 000	Frw 000
Tier I capital	23,321,810	16,645,410
Adjustment	1,654,616	794,599
Total capital	24,976,426	17,440,009
Risk-weighted assets		
Credit risk weighted assets	116,628,804	58,151,530
Market risk weighted assets equivalent	1,133,206	333,539
Operational risk equivalent assets	14,607,251	5,082,809
Total risk-weighted assets	132,369,261	63,567,878
	2022	2021
Basel ratios		
Tier I	17.62%	26.2%
Total capital	18.87%	27.4%

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

The decrease in total and core capital can be attributed to the Net of capital injected through new investment and losses for the year.

Determination of fair value

In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques, as summarised below:

- **Level 1 financial instruments** – Those where the inputs used in the valuation are unadjusted quoted prices from active markets for identical assets or liabilities that the Bank has access to at the measurement date.

The Bank considers markets as active only if there are sufficient trading activities with regards to the volume and liquidity of the identical assets or liabilities and when there are binding and exercisable price quotes available on the balance sheet date.

- **Level 2 financial instruments** – Those where the inputs that are used for valuation and are significant, are derived from directly or indirectly observable market data available over the entire period of the instrument's life. Such inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical instruments in inactive markets and observable inputs other than quoted prices such as interest rates and yield curves, implied volatilities, and credit spreads. In addition, adjustments may be required for the condition or location of the asset or the extent to which it relates to items that are comparable to the valued instrument. However, if such adjustments are based on unobservable inputs which are significant to the entire measurement, the Bank will classify the instruments as Level 3.

- **Level 3 financial instruments** – Those that include one or more unobservable input that is significant to the measurement as whole.

The fair value of financial instruments is generally measured on an individual basis. However, in cases where the Bank manages a group of financial assets and liabilities on the basis of its net market or credit risk exposure, the fair value of the group of financial instruments is measured on a net basis, however the underlying financial assets and liabilities are presented separately in the financial statements, unless they satisfy the IFRS offsetting criteria

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

Fair value estimation

Frw'000	Carrying amount	Fair value	Quoted prices in active market	Significant observable inputs	Significant unobservable inputs
			Level 1	Level 2	Level 3
31 December 2022					
Government securities at amortised cost	26,740,647	26,740,647	-	26,740,647	-
Customer Loans and advances	86,790,615	86,790,615	-	-	86,790,615
Customer deposits	95,792,632	95,792,632	-	95,792,632	-
Due to other banks	6,550,728	-	-	6,550,728	-
31 December 2021					
Government securities at amortised cost	23,907,905	23,907,905	-	23,907,905	-
Customer Loans and advances	52,124,448	52,124,448	-	-	52,124,448
Customer deposits	70,488,008	-	-	70,488,008	-
Due to other banks	7,252,422	-	-	7,252,422	-

The carrying value for level 2 and 3 approximates the fair value because the market rates approximate the current interest rates available in the bank. The bank's assets and liabilities securities comprise of mixed maturity periods and with fixed interest rates where applicable. Prices are determined based on the available interest rates and are carried at amortized costs.

4) Critical accounting estimates and judgements in applying accounting policies

The preparation of the bank's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities, and the accompanying disclosures, as well as the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. In the process of applying the bank's accounting policies, management has made the following judgements and assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Existing circumstances and assumptions about future developments may change due to circumstances beyond the bank's control and are reflected in the assumptions if and when they occur. Items with the most significant effect on the amounts recognised in the consolidated financial statements with substantial management judgement and/or estimates are collated below with respect to judgements/estimates involved.

(a) Going concern

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(b) Impairment losses on financial assets at amortised cost

The measurement of impairment losses under IFRS 9 across all categories of financial assets in scope requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The bank's internal credit grading model, which assigns PDs to the individual grades
- The bank's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime expected credit losses basis and the qualitative assessment
- The segmentation of financial assets when their expected credit losses is assessed on a collective basis
- Development of expected credit losses models, including the various formulas and the choice of inputs
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models

It has been the Bank's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

The directors use estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience. Were the net present value of estimated cash flows differ by +/-1%, the impairment loss is estimated to be Frw 86 million higher or lower (2021: Frw 46 million).

Refer to note 17 for disclosure of carrying amounts.

(c) Lease term

In determining the lease term, management has applied 10 years in regard to the head office and the branch at Kigali Heights, this driven by management's view on the significant investment made on these premises as well as that there are currently no plans for relocation. For Kigali Height, La bonne and Down Town branches management have applied a period of 10, 2 and 6 years respectively without extension period as these were legacy branches for which options are still being evaluated, the period is hence aligned to the current lease period. Had a period of 10 years been applied to all branches then right of use asset and lease liability would have increased to Frw 2.0 billion and Frw 2.2 billion respectively.

For the other assets such as data backup center a period of 3 years has been applied

Refer to note 21 for disclosure of carrying amount

(d) Assessment of useful lives and residual values of non-financial assets such as property and equipment and intangible asset

The estimation of the residual values and useful lives involves significant judgement. The residual values, useful lives and methods of depreciation are reviewed, and adjusted if appropriate, at each reporting date. Changes in the expected useful life, residual values or methods of depreciation are accounted for as changes in accounting estimates.

Refer to note 20 for disclosure of carrying amount

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

(e) Impairment of non- financial assets

An impairment review of property, plant and equipment is carried out when there is an indication that these may be impaired by comparing the carrying amount thereof to its recoverable amount.

The carrying amounts of the bank's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment which include changes in technology and change of law or decisions from the parent company. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in profit or loss in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro-rata basis. There is no indication of impairment of assets.

(f) Determination of fair value

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 2 financial instruments – Those where the inputs that are used for valuation and are significant, are derived from directly or indirectly observable market data available over the entire period of the instrument's life. Such inputs include quoted prices for similar assets or liabilities in active markets, quoted prices for identical instruments in inactive markets and observable inputs other than quoted prices such as interest rates and yield curves, implied volatilities, and credit spreads. In addition, adjustments may be required for the condition or location of the asset or the extent to which it relates to items that are comparable to the valued instrument. However, if such adjustments are based on unobservable inputs which are significant to the entire measurement, the Bank will classify the instruments as Level 3.

Level 3 financial instruments – Those that include one or more unobservable input that is significant to the measurement as whole. The fair value of financial instruments is generally measured on an individual basis. However, in cases where the bank manages a group of financial assets and liabilities on the basis of its net market or credit risk exposure, the fair value of the group of financial instruments is measured on a net basis, however the underlying financial assets and liabilities are presented separately in the financial statements, unless they satisfy the IFRS offsetting criteria.

(i) Income taxes

The Bank is subject to taxation laws of Rwanda. Significant estimates are required in determining the provision for income taxes. There may be transactions and calculations, during the normal course of business, whose ultimate tax impact determination has an element of uncertainty. In determining the interpretation and/or application of the various tax rules, disputes may arise with the relevant tax authorities, of which the outcome may not be favorable to the bank. In such cases, the Bank relies on internal management expertise and where relevant, seeks expert advice to determine whether the unfavourable outcome is probable or possible.

Where objective estimates of the potential tax liabilities that may crystallize from such tax disputes are determinable, the Bank recognises provision in line with IAS 37 - Provisions, Contingent Liabilities and Contingent Assets principles. In such cases, if the final tax determination is different from the amounts that were initially recorded, the difference will impact the current income tax and deferred income tax provisions in the period in which such determination is made. Where payment is determined to be possible but not probable, the tax exposure is disclosed as a contingent liability. Refer to note 12 and 26 for disclosure of carrying amounts

Trainings	90,189	16,078
	3,047,434	2,082,136
(c) Depreciation and Amortization		
Depreciation of fixed assets	445,183	339,290
Depreciation of right of use assets	435,660	323,363
Software amortization	218,061	111,258
	1,098,904	773,911
11. Income tax expense		
Deferred income tax (note 25)	(589,897)	269,700
	(589,897)	269,700

The income tax based on the bank's loss before income tax differs from the theoretical amount that would arise using the statutory income tax rate applicable as follows:

	2022	2021
	Frw 000	Frw 000
Profit before income tax	4,850,672	231,789
Tax calculated at the statutory income tax rate of 30% (2021- 30%)	1,455,202	69,537
Expenses not deductible for tax purposes	60,135	32,879
Prior year adjustment-Over provision	-	23,659
Deferred tax not recognized/ (Utilized)	(159,510)	(395,775)
	1,355,828	(269,700)

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

	2022	2021
12. Cash and bank balances with National Bank of Rwanda	Frw 000	Frw 000
Cash in hand	2,029,558	1,010,670
Balances with National Bank of Rwanda	9,916,217	6,387,360
Total	11,945,775	7,398,030
Mandatory cash reserve deposits	4,783,552	2,164,883
13. (a) Due from banking institutions		
Current accounts, overnight and call deposits	13,336,111	6,348,295
	13,336,111	6,348,295
13 (b) Analysis of cash and cash equivalents		
Cash in hand	2,029,558	1,010,670
Balances with BNR	9,916,217	6,387,360
Due from other banking institutions	13,336,111	6,348,295
Total	25,281,886	13,746,325
All the balances due from banking institutions had maturities of less than 91 days from date of placement.		
14. Government securities		
Treasury bills – amortised cost	13,540,774	8,746,924
Fixed rate Treasury bonds – amortised cost	11,098,523	11,034,227
Other securities -amortised cost	2,149,350	4,126,754
Expected credit losses	(48,000)	-
	26,740,647	23,907,905
Comprising:		
Treasury bills and bonds maturing within 91 days from date of acquisition	2,889,347	2,049,393
Treasury bills and bonds maturing after 91 days but within 364 days from date of acquisition	13,007,352	12,190,743
Treasury bills and bonds maturing after 364 days from date of acquisition	10,843,948	9,667,769
	26,740,647	23,907,905

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

	2022 Frw 000	2021 Frw 000
15. a) Loans and advances to customers		
Term loans	78,498,526	46,723,324
Overdrafts	10,902,954	6,747,880
Credit card balances	109,727	79,699
Gross loans and advances	89,511,207	53,550,903
Less: Expected credit loss		
- Stage 3	(406,701)	(34,916)
- Stage 2	(282,689)	(109,663)
- Stage 1	(2,031,202)	(1,181,876)
Total ECL	(2,720,592)	(1,426,455)
Net customer Loans and advances	86,790,615	52,124,448

Movements in provisions for impairment of loans and advances are as follows:

	Stage 1 Frw'000	Stage 2 Frw'000	Stage 3 Frw'000	Total Frw'000
Year ended 31 December 2022				
At 1 January	1,181,876	109,663	134,916	1,426,455
Charge for the year	964,010	121,631	780,781	1,866,422
Loans written off during the year as uncollectible	-	-	(320,214)	(320,214)
At 31 December 2022	2,031,202	282,689	658,772	2,972,663

The movement in impairment of gross loans was impacted by write off of non-performing loan therefore significant increase in gross loans is not correlating to changes in expected credit losses; the impact is shown in the credit losses expenses in the statement of profit and loss. The Bank has written-off financial assets that are still subject to enforcement activity. The outstanding contractual amounts of such assets written off during the year ended 31 December 2022 was Frw 2,866,028 (2021: Frw 2,565,814) The Bank still seeks to recover amounts it is legally owed in full, but which have been partially written off due to no reasonable expectation of full recovery.

Movements in provisions for impairment of loans and advances

22. Due to group		
Due to NCBA Group PLC	968,594	852,798
	968,594	852,798

NCBA Group PLC is the ultimate parent of NCBA Rwanda PLC. The intercompany balance relates to amount advanced by NCBA Group PLC to NCBA Rwanda PLC

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

	2022 Frw'000	2021 Frw'000
23. Other Liabilities		
Clearing items	369,800	343,056
Taxes withheld not due	94,427	87,928
Accrued general expenses	2,840,677	823,265
	3,304,894	1,254,249

Accrued general expenses consist of group shared costs for the period; Clearing accounts are temporary and transitory accounts pending compensation house clearing including cheques in transit to other banks.

24(a) Deferred income tax

Deferred income tax is calculated using the enacted income tax rate of 30% (2021 - 30%). The movements in the deferred income tax account were as follows:

	2022 Frw 000	2021 Frw 000
At start of year	79,412	(190,288)
Charge/(credit) for the year	589,896	269,700
At end of year	669,308	79,412

Deferred income tax assets and liabilities, deferred income tax credit in profit or loss and deferred income tax charge in shareholders' equity are attributable to the following items:

	At start of year Frw 000	Credited / (debited) to profit or loss Frw 000	At end of year Frw 000
Year ended 31 December 2022			
Deferred income tax assets			
Property and equipment	(179,253)	1,530	(177,723)
Provision for impairment losses	262,236	660,881	923,117
IFRS 16	(45,154)	(30,932)	(76,086)
Accumulated tax losses	41,583	(41,583)	-
Net deferred income tax asset / (liability)	79,412	589,896	669,308

	At start of year Frw 000	Credited / (debited) to profit or loss Frw 000	At end of year Frw 000
Year ended 31 December 2021			
Deferred income tax assets			
Property and equipment	(190,288)	11,035	(179,253)
Provision for impairment losses		262,236	262,236
IFRS 16		(45,154)	(45,154)
Accumulated tax losses	-	41,583	41,583
Net deferred income tax asset / (liability)	(190,288)	269,700	79,412

The bank has recognised deferred tax asset for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. The bank has made a projection that it will be able to generate sufficient taxable profit to allow it to utilize tax losses carried forward

The number of authorized fully paid shares is 3,399,604

The shareholder made capital injection of Frw 3.9 billion during the period

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

28. Off-balance sheet financial instruments and commitments

The bank conducts business involving acceptances, guarantees, performance bonds and indemnities. These facilities are obligations on behalf of customers, in the normal course of business, matched and with recourse. In addition, there are other off-balance sheet financial instruments including foreign exchange forward contracts for the purchase and sale of foreign currencies, the nominal amounts of which are not reflected in the balance sheet.

Off balance sheet items and commitments	2022	2021
	Frw 000	Frw 000
Guarantees	7,377,687	4,081,134
Letters of credit	3,470,313	
Financing commitment given	4,242,017	1,282,005
	15,090,017	5,363,139

Nature of off-balance sheet financial instruments

Letters of credit commit the bank to make payments to third parties, on production of documents, which are subsequently reimbursed by customers.

An acceptance is an undertaking by a bank to pay a bill of exchange drawn on a customer. The Bank expects most acceptances to be presented and reimbursement by the customer is normally immediate.

Guarantees are generally written by the Bank to support performance by a customer to a third party. The Bank would only be required to meet these obligations in the event of default by a customer.

Nature of commitments

Commitments to lend are agreements to lend to a customer in future, subject to certain conditions, and are normally for a fixed period. The bank may withdraw from its contractual obligation for the un-drawn portion of agreed overdraft limits by giving reasonable notice to a customer.

Foreign exchange forward contracts are agreements to buy or sell a specified quantity of foreign currency, usually on a specified future date at an agreed price.

29. Related parties

The ultimate Parent company is NCBA Group Plc. which is incorporated in Kenya. Parties are considered related if one party has the ability to control the other party or exercise significant influence over that party's financial or operational decisions. In the normal course of business, current accounts are operated, and placements made between the Group companies at interest rates in line with the market. The relevant balances at the end of the year and income / expense thereon are shown below:

Related party deposits	2022	2021
	Frw 000	Frw 000
	417,850	37,779

The above deposits are from directors, companies on whose boards the directors serve and from companies with common shareholders as the bank.

	=	-
Syndicated loans		
Loans syndicated with group	15,248,409	15,222,114

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

for the year ended 31 December 2022

Syndicated Loans disclosed is a portion of loan syndication between the bank and the group to finance large finance projects in Rwanda. Syndicated loans are jointly provided to the borrowers by the bank and the group on the same terms and conditions. The bank acts as the leading bank therefore interest rates, loan charges and other credit terms are negotiated between the bank and the customer. The risk exposure is spread between the bank and the group proportionately. The bank collects all payments from the customers and pays the group its portion. The bank does not have any other relationship with the customers other than business relationship.

30. Comparatives

Where necessary, comparative figures have been restated to conform to changes in presentation in the current year.
